The Muncie 4-speeds, M20, M21, and M22 are some of the most popular manual

transmissions ever made and continue to be incredibly

popular. The Muncie was the top high-performance manual

transmission GM offered in its muscle cars of the 60s

and early 70s. It was

installed in the Camaro,

Chevelle, Buick GS, Pontiac

GTO, Olds Cutlass, and many

other classic cars. Many

owners want to retain the

original transmission in their detail on the identification classic cars to maintain its value. Transmission expert and veteran author Paul Cangialosi has created an indispensable reference to Muncie 4-speeds that guides you through each crucial stage of the rebuild process. Comprehensive ID information is provided, so you can positively identify the cases, shafts, and related parts. It discusses available models, parts options, and gearbox cases. Most important, it shows how to completely disassemble the gearbox, identify wear and damage, select the best parts, and complete the rebuild. It also explains how to choose the ideal gear ratio for a particular application. Various high-performance and racing setups are also shown, including essential modifications, gun drilling the shafts, cutting down the gears to remove weight, and achieving race-specific clearances. Muncie 4-speeds need rebuilding after many miles of service and extreme use. In addition, when a muscle car owner builds a high performance engine that far exceeds stock horsepower, a stronger high-performance transmission must be built to accommodate this torque and horsepower increase. No other book goes into this much

of the Muncie 4-speed, available parts, selection of gear ratios, and the rebuild process.

The world's savviest investors are those who can recognize when the herd is running headlong in the wrong direction and can take advantage of their fear and confusion. That's never been truer than it is right now. Now, there's a book that will show you how to earn the same outside returns these savvy value investors do. Buying at the Point of Maximum Pessimism will help you uncover enormous value opportunities that keep on emerging even as the economic crisis keeps spreading. Lauren Templeton Capital Management principal D. Scott Phillips, Jr., co-author of the best-seller Investing the Templeton Way, has systematically updated the proven techniques of value investing for today's radically new markets. Phillips carefully identifies crucial changes underway in the financial system and investing landscape, and offers investing solutions that respond to today's crucial new risks. You'll learn how to invest in markets facing an increased government role and lower access to capital; manage growing risk of inflation spikes; scavenge for profits in distressed sectors; find winning opportunities overseas; and much more. Every market offers opportunity to those who can find value where others aren't

looking. Today, there's no more important investing skill and *Buying at the Point of Maximum Pessimism* is the one book that will teach it to you.

An insider's look at the science of near-Earth comets and asteroids Of all the natural disasters that could befall us, only an Earth impact by a large comet or asteroid has the potential to end civilization in a single blow. Yet these near-Earth objects also offer tantalizing clues to our solar system's origins, and someday could even serve as stepping-stones for space exploration. In this book, Donald Yeomans introduces readers to the science of near-Earth objects—its history, applications, and ongoing quest to find near-Earth objects before they find us. In its course around the sun, the Earth passes through a veritable shooting gallery of millions of nearby comets and asteroids. One such asteroid is thought to have plunged into our planet sixty-five million years ago, triggering a global catastrophe that killed off the dinosaurs. Yeomans provides an up-to-date and accessible guide for understanding the threats posed by near-Earth objects, and also explains how early collisions with them delivered the ingredients that made life on Earth possible. He shows how later impacts spurred evolution, allowing only the most adaptable species to thrive—in fact, we humans may owe our very existence to objects that struck our planet. Yeomans takes readers behind the scenes of today's efforts to find, track, and study near-Earth objects. He shows how the same comets and asteroids most likely to collide with us could also be mined for precious natural resources like water and oxygen, and used as watering holes and fueling stations for expeditions to Mars and the outermost reaches of our solar system.

This first book of its kind tells the behind-the-scenes story of the incredibly illegal Cannonball rally. This best seller is now available in paperback! In the early 1970s, Brock Yates,

senior editor of *Car and Driver Magazine*, created the now infamous Cannonball Sea-to-Shining-Sea Memorial Trophy Dash; a flat out, no-holds-barred race from New York City to Redondo Beach, California. Setting out to prove that well trained drivers could safely navigate the American highways at speeds in excess of the posted limits, Mr. Yates created a spectacle reminiscent of the glory days of the barnstorming pilots. Filled with fascinating unpublished stories, nostalgic and modern-day photographs, inside information and hilarious stories from this outrageous and incredibly immoral rally. Brock is one of the best-known, most respected automotive journalists in the world today.

The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300

photographs.

This book tells the El Camino story through contemporary road and comparison tests plus model introductions and includes full technical and specification data. The El Camino made its debut in 1959 but was dropped between 1961 and 1963. The 1968 range was the first to carry a Super Sport option and the seventies also saw an estate derivative. Both disappeared after 1977 with the arrival of emissions regulations. Later models did not disappoint however, and the variants of the early eighties were to the forefront of the latest developments. Models covered: the 283, 327, 348, 305, 350, 396, SS 396, Trimatic, 454, 4100 auto, Turbo diesel and Super Sport.

Motor Auto Repair Manual Motorbooks
From world-renowned author Erich Segal comes a powerful and moving saga of five extraordinary members of the Harvard class of 1958 and the women with whom their lives are intertwined. Five lives, five love stories: Danny Rossi, the musical prodigy, risks it all for Harvard, even a break with his domineering father. Yet his real problems are too much fame too soon—and too many women. Ted Lambros spends his four years as a commuter, an outsider. He is obsessed by his desire to climb to the top of the Harvard academic ladder, heedless of what it will cost him in personal terms. Jason Gilbert, the Golden Boy—handsome, charismatic, a brilliant athlete—learns at Harvard that he cannot ignore his Jewish background. Only in tragedy will he find his true identity. George Keller, a refugee from Communist Hungary, comes to Harvard with the barest knowledge of English. But with ruthless determination, he masters not only the language but the power structure of his new country. Andrew Eliot is haunted by three

centuries of Harvard ancestors who cast giant shadows on his confidence. It is not until the sad and startling events of the reunion that he learns his value as a man. Their explosive story begins in a time of innocence and spans a turbulent quarter century, culminating in their dramatic twenty-five year reunion at which they confront their classmates—and the balance sheet of their own lives. Always at the center; amid the passion, laughter, and glory, stands Harvard—the symbol of who they are and who they will be. They were a generation who made the rules—then broke them—whose glittering successes, heartfelt tragedies, and unbridled ambitions would stun the world.
