Bedford Buses and Coaches provides a detailed review of the entire range of purpose-built Public Service Vehicle (PSV) bus and coach chassis that carried the Bedford name from 1931 until production ceased in 1986. Bedfords were once a familiar sight on the roads not only of the United Kingdom, but throughout the world. They were produced in such volume that the advertising slogan 'You see them everywhere' was quite legitimately adopted by Vauxhall Motors, the manufacturer of Bedford vehicles. Fully illustrated

throughout with hundreds of photographs, the majority in colour, the book includes detailed descriptions of the Bedford petrol and diesel engines and other manufacturers engines used in Bedford bus and coach chassis. Detailed specifications and production histories are given for all the full-size passenger chassis including the WHB/WLB, WTB, OB/OWB, SB, VAS, VAL, VAM, Y-series and the Venturer. Road tests and owners' experiences are covered along with advice on buying and restoring a Bedford bus or coach. This book will be of great interest to all bus enthusiasts and historians and is superbly illustrated with 200 colour and 50 black & white photographs. The Road Way 30 Degrees South Publishers

Mine-protected and mine-resistant, ambush-protected (MRAP) vehicles are today standard in the US, most major western armed forces and many other armies as a result of the wars in Iraq and Afghanistan. The South African Army

was already routinely using mine-protected armored personnel carriers and patrol vehicles forty years ago even if they looked primitive and ungainly. A few years later, the South African Army had reached the stage where it could deploy entire combat groups into battle zones equipped with only mine-protected vehicles, including their ambulances and supply trucks. By then the mine-protected vehicles had also become effective for use in combat, rather than just protected transport, the Casspir being the chief example. More to the point, they saved countless soldiers and policemen from death or serious injury, and the basic concepts now live on in the various MRAP types in service today. The valuable lessons learned by the South Africans with their early designs of these combat-proven vehicles has led the country to become one of the global leaders in the

design of MRAPs which are locally manufactured and exported around the world. Surviving the Ride is a fascinating pictorial account featuring more than 120 of these unique South African-developed vehicles, spanning a forty-year period, with over 280 photographs, many of which are previously unpublished.
