Marine Diesel Engines and Gas Turbines  
Pounder ' s Marine Diesel Engines and Gas  
Turbines, Tenth Edition, gives engineering  
cadets, marine engineers, ship operators and  
managers insights into currently available  
engines and auxiliary equipment and trends  
for the future. This new edition introduces  
new engine models that will be most  
commonly installed in ships over the next  
decade, as well as the latest legislation and  
pollutant emissions procedures. Since  
publication of the last edition in 2009, a  
number of emission control areas (ECAs)  
have been established by the International  
Maritime Organization (IMO) in which  
exhaust emissions are subject to even more  
stringent controls. In addition, there are  
now rules that affect new ships and their

emission of CO<sub>2</sub> measured as a product of  
cargo carried. Provides the latest emission  
control technologies, such as SCR and water  
scrubbers Contains complete updates of  
legislation and pollutant emission procedures  
Includes the latest emission control  
technologies and expands upon remote
