"Since the early days of racing, Chrysler, Dodge, and Plymouth have dominated drag strips and race tracks. During 1955 alone, Chrysler 300s won 37 major stock car races and clinched both the NASCAR and AAA stock car championships. Although the impressive engine options of 1950s consistently out-performed the competition, they were a mere opening act for the extremes of performance that would be unleashed throughout the 1960s--the golden era of drag racing and factory super-performance cars. Maximum Performance: Super Stock Drag Racing 1962-1969 details Chrysler's amazing dominance in this era. Its drivers were among drag racing's first paid professional racers, and this book covers the complete story of Mopar drag racing accompanied by historical imagery as well as contemporary photos. This is the real story behind Super Stock and Factory Experimental drag racing as told the people who lived it!"--Publisher's description.

Dodge Full-Size Pickups) McFarland) In this exciting new history of Dodge and Ram trucks, award-winning automotive author Patrick Foster details the genesis of today's hot-selling Ram pickups, vans and four-wheel-drives. Beginning with the Graham Brothers, who built the first trucks sold through Dodge dealers, Foster traces the path of Dodge commercial vehicles through the terrific Dodge trucks built during the Roaring Twenties and into the Depression Thirties. Foster then takes us into the war years, 1941-1945, when Dodge manufactured a broad array of war materiel including the mighty WD and WF trucks, which later morphed into the now-legendary postwar Dodge Power Wagons. Next, Foster dives into the decade of the fabulous 1950s, a golden era for American pickups that brought us the equally fabulous Dodge B and C series trucks. Entering the 1960s, Foster tells the story of the growing popularity of Dodge trucks. The story grows as the Dodge line expands in size and in sales. The Dodge D-series and four-wheel-drive W-series are covered in a following chapter, while another is dedicated to the Dodge cabover trucks. The book ends with an Addendum dedicated to the delightful Dodge cabovers. The final chapter of Dodge and Ram Pickups: An

Illustrated History covers the turbulent years 2000-2020 when Dodge went from being part of a bankrupt company to its present position today as the number 2 selling full-size pickup in the world.

From the resumption of automobile production at the close of World War II through the 1950s, the American auto industry would see the births and deaths of several manufacturers, great technological advances, and an era of dramatic styling as a prospering nation asserted its growing mobility. Cars of this period are among the most iconic vehicles ever built in the United States: the 1949 Ford, the remarkable Studebaker designs of 1950 and 1953, the 1955 – 1957 Chevrolets, the “ Forward Look ” Chrysler products, the ill-fated Edsel and many others. This comprehensive reference book details every model from each of the major manufacturers (including independents such as Kaiser-Frazer and Crosley but excluding very low-volume marques such as Tucker) from model years 1946 through 1959. Year by year, it provides an overview of the industry and market, followed by an individual report on each company: its main news for the year (introductions or cancellations of models, new engines and transmissions, advertising themes, sales trends etc.); its production figures and market status; and its powertrain offerings, paint colors and major options. The company ' s models are then detailed

individually with such information as body styles, prices, dimensions and weights, standard equipment and production figures. Nearly 1,000 photographs are included.
