Reality Is Broken Stoddart

“ McGonigal is a clear, methodical writer, and her ideas are well argued. Assertions are backed by countless psychological studies. ” —The Boston Globe

“ Powerful and provocative . . . McGonigal makes a persuasive case that games have a lot to teach us about how to make our lives, and the world, better. ”

—San Jose Mercury News “ Jane McGonigal's insights

have the elegant, compact, deadly simplicity of plutonium, and the same explosive force. ” —Cory Doctorow, author of Little Brother A visionary game

designer reveals how we can harness the power of games to boost global happiness. With 174 million gamers in the United States alone, we now live in a

world where every generation will be a gamer generation. But why, Jane McGonigal asks, should games be used for escapist entertainment alone? In

this groundbreaking book, she shows how we can leverage the power of games to fix what is wrong with the real world—from social problems like

depression and obesity to global issues like poverty and climate change—and introduces us to cutting-edge games that are already changing the business,

education, and nonprofit worlds. Written for gamers and non-gamers alike, Reality Is Broken shows that the future will belong to those who can understand,

design, and play games. Jane McGonigal is also the author of SuperBetter: A Revolutionary Approach to Getting Stronger, Happier, Braver and More

Resilient.

Drawing Futures brings together international designers and artists for speculations in

contemporary drawing for art and

architecture. Despite numerous developments in

technological manufacture and computational design that provide new grounds for designers, the act of

drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as

to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned

by computational networks and interfaces allowing hitherto unprecedented views of the world, the

changing status of the drawing and its representation as a political act demands a platform for reflection

and innovation. Drawing Futures will present a compendium of projects, writings and interviews that

critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the

discussion of how the field of drawing may expand synchronously alongside technological and

computational developments. The book coincides with an international conference of the same name,

taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together

practitioners from many creative fields, the book discusses how drawing is changing in relation to new

technologies for the production and dissemination of ideas.
