Throughout the history of law enforcement, the internal investigation process has held the most negative connotation of any investigation conducted by law enforcement personnel. As we progress through the new millennium, the need for efficient and effective law enforcement services and practices grows ever more critical. The goal of this book is to demonstrate this need for proper and complete internal investigations, and to teach the entry level and tenured police supervisor the form and function of the internal investigations process. The text selectively focuses on the purposes and practical implications of internal investigations and the pitfalls. The goal is to guide students and professionals through definitions, terminology, legal and labor issues, case law, techniques and procedures, critical and special investigations, including issues in administrative and civil claims. The reader will find a model for conducting internal investigations of police personnel that will allow a police supervisor or commander to perform investigations in a thorough, ethical, legal, and equitable manner. This book will meet the needs of attorneys who litigate cases involving allegations of police misconduct as well as representatives of collective bargaining groups who represent police personnel in similar actions. The text ends with the offering of evidence identification, evaluation and collection, case review processes, risk management, training and managing internal investigators, and the future trends in internal investigations.

Cars have always appealed as model subjects as - unlike aeroplanes or military subjects - the real thing is likely to be sitting outside the modeller's house. From the first car kits produced in the early 1950s, mainly dominated by American machinery, we now have a choice of automotive examples from around the world. The joint scale of 1:24/1:25 dominates car models, and it is these scales that will mostly be found in this book, from stock builds to race cars to wild customs. In addition, although injection styrene is the main material of choice, there are specialist builds using resin, white metal and photo-etched parts. The book includes detailed step-by-step guides for Building 'out of the box'; Customs and conversions; Applying decals; Dealing with resin; Wiring and engines; Salvaging old kits; A dented ride for 007; NASA's Hot Road; Dirtying a dirt track racer; An alien homage to Roth. Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciationMany 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underwayEthanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive EngineersGM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade agoYou can save \$2,000 by cutting freight fees and "administrative" chargesDiesel annual urea fill-up scams cancost you \$300, including an \$80 "handling" charge for \$25 worth of ureaLemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki Lemon-Aid New Cars and Trucks 2012 Dundurn

Causes of Action Second CarTech Inc

This book is designed for criminal justice instructors. It requires them to help students work through the various police reports. The reports are intentionally left incomplete to require students to work through them. Some reports may seem to ask confusing questions, which may lead to unreliable responses. This is to be used as a lesson: unreliable responses create statistics that are not valid. Managers need to improve the forms in order to obtain valid data. This book first discusses communication theory and how it applies to police officers and prosecutors in the courtroom. Information presented in the courtroom by police officers has a significant impact upon the jurors. Indeed, police officers communicate both verbally and nonverbally in the courtroom and this affects their credibility on the stand. Furthermore, by employing persuasion theories, prosecutors can align the officers' testimonies to the jurors' particular communication preference. Second, this book discusses truth as it relates to probable cause and beyond reasonable doubt. Finally, because report writing is a significant part of police work, this book presents a variety of police forms that will engage students in written communication.

Forgotten Heroes iUniverse

For decades, American hungers sustained Tijuana. In this scientific detective story, a public health expert reveals what happens when a border city's lifeline is brutally severed. Despite its reputation as a carnival of vice, Tijuana was, until recently, no more or less violent than neighboring San Diego, its sister city across the border wall. But then something changed. Over the past ten years, Mexico's third-largest city became one of the world's most dangerous. Tijuana's murder rate skyrocketed and produced a staggering number of female victims. Hundreds of women are now found dead in the city each year, or bound and mutilated along the highway that lines the Baja coast. When Dan Werb began to study these murders in 2013, rather than viewing them in isolation, he discovered that they could only be understood as one symptom among many. Environmental toxins, drug overdoses, HIV transmission: all were killing women at overwhelming rates. As an epidemiologist, trained to track epidemics by mining data, Werb sensed the presence of a deeper contagion targeting Tijuana's women. Not a virus, but some awful wrong buried in the city's social order, cutting down its most vulnerable inhabitants from multiple directions. Werb's search for the ultimate causes of Tijuana's femicide casts new light on immigration, human trafficking, addiction, and the true cost of American empire-building. It leads Werb all the way from factory slums to drug dens to the corridors of police corruption, as he follows a thread that ultimately leads to a surprising turn back over the border, looking northward. " City of Omens is a compelling and disturbing tour of a border world that outsiders rarely see - and simultaneously, a clear guide to a field of public health that offers an essential framework for understanding how both ideas and diseases can spread. " -- MAIA SZALAVITZ, author of Unbroken Brain " Dan Werb combines his expertise as a trained epidemiologist with his keen discernment as an investigative journalist to depict what happens when poverty, human desperation, and unfathomable greed at the highest levels of a society mix with imperial ambition and a criminally ill-conceived policy towards drug use. It is a riveting and heartbreaking story, told with eloquence and compassion. " -- GABOR MAT É , MD, bestselling author of In the Realm of Hungry Ghosts: Close Encounters with Addiction " City of Omens is an urgent and needed account of a desperate problem. The perils that Mexico's women face haunt the conscience of a nation. " -- ALFREDO CORCHADO, author of Homelands and Midnight in Mexico Department of Transportation and related agencies appropriations for 1986 Balboa Press When purchasing your vehicle, you should probably expect to be lied to by everyone from the sales department to the financial department. Apples, Oranges, and Lemons is a

one-of-a-kind, tell-all book about the automobile trade that reveals inside secrets they don't want you to know. There is no other book like it. It is written by the only person who could, or would. Phillip James Grismer knows the automobile industry from the inside out. He first apprenticed in a number of import auto shops, eventually rising through the ranks and opening his own facility. Grismer draws on his thirty-seven years of experience to expose how the industry really works. He provides answers on how to deal with a "lemon" while offering advice on how to make the best buy before purchasing your vehicle. Discover how the valuation and appraisal process works and how the history of your vehicle affects you and your money. Grismer's conversational style makes the information accessible while offering personal insight on the process of vehicle manufacturing and servicing. Even the most casual reader will be enlightened and entertained by the inner workings of the automobile manufacturing, sales, and service industry. But most importantly, this handy reference guide empowers the consumer to make well-informed decisions about vehicles.

Macmillan

This is real police work. Fast furious and in the end, the criminal turns out to be just who you thought it would be, but getting there involves a lot of inside politics, authority, and treachery. Ed Ashbrook is a crusty police officer with lots of years behind the wheel of the Ford Crown Victoria and his life is a mess of divorce, affairs, citations, and performance reviews with criticism of his actions toward the bad guys. That Ashbrook is a good cop never leaves your mind. He does things just slightly askew, but then again, he doesnt endanger any case hes bringing. Look for the bad guy to do something incredibly stupid. And he does. Ashbrook makes a good arrest and when you read the book it has a page turning, stay awake to read it, and sigh with satisfaction when youre done feeling about it.

Full Size Fords: 1955-1970 is a fascinating retrospective of the cars - the design process, manufacturing, equipment packages, and a thorough listing of options, interior patterns, and paint codes. All models from 1955 to 1970 that brought Ford to dominance in the full-size category are revealed in compelling detail. The introduction of the Galaxie, the development of the Skyliner retractable roof car, the radical redesign of the 1960 models to counter Chevy's new sedan, and much more is covered. Period magazine reviews provide insight and perspective of the driving experience and performance of various full-size models. A fascinating retrospective on Ford Y-Block engines as well as Ford FE engine family and the new for 1970 Lima series engine is also provided. In addition, author David Temple examines Ford's racing exploits, featuring the dual-quad 427 Cammer engine, the Galaxie Grand

National race car, and factory and lightweight drag cars.
