Introduced at the opening of the New York World's Fair in April 1964, the Ford Mustang was based on

mechanicals from the earlier Ford Falcon compact car. It quickly established a new motorcar category—the “pony car”—which was widely copied by domestic and overseas competitors. From the outset, the Mustang represented inspired product planning and design, followed by brilliantly executed marketing. Ford's Mustang team effort used every tool in the vehicle-marketing toolbox: clever teasers long before the new product went on sale, unprecedented publicity, simple but effective

advertising, the stage at the World's Fair, movie placement, distribution of toy plastic models, and even a replica pedal car for the young drivers of the future. With a measure of luck, it became a classic case of releasing the right product at the right time, and Ford sold one million units in less than two years.

More than Mustang and Cougar. Though the Mustang remains Ford's most famous muscle car, the company had been building muscle cars since it introduced the sleek Fairlane and Galaxie models with optional 390 cubic-inch big-

block V-8 engines in 1961. These cars were part of Ford's Total Performance program, which tested cars in the crucible of racing at drag strips, oval circuits, European rally events, and road courses, resulting in legendary muscle cars like the Shelby Mustang, Boss 302 and 429 Mustangs, Mercury Cougar, Cyclone GT, and Spoiler. The Complete Book of Classic Ford and Mercury Muscle Cars covers all of Ford Motor Company's high-performance muscle cars from the early 1960s to 1973. Of the legendary names in the history of the Ford Mustang, one stands apart: Boss. Originally created to

homologate the new Boss 302 engine for SCCA Trans-Am racing, the Boss 302 Mustang was built in limited numbers for the street. Designed by legend Larry Shinoda, the Boss cars were easily distinguished from their less potent stable mates by their unique front and rear spoilers, rear window slats, and the omission of the standard Mustang's (fake) rear fender brake ducts. Also standard was a shaker hood scoop and bold graphics. Though Mustang performance faded to all-time lows as the 1970s rolled on, there was

good news on the way. The pairing of the venerable 302 Windsor engine with the new Fox-body platform for the 1979 Mustang might not have seemed significant at the time, but it was the first edition of what would become a performance institution in the late 20th century: the 5-liter Mustang was an overwhelming force on the streets and tracks through the end of its production in 1995. With no small amount of fanfare, Ford is paying homage to its performance past with the re-introduction of the 5.0 liter

powerplant in the Mustang GT for 2011.

Ford Mustang 1964 1/2 to 1973 Ford
Shelby Mustang details the entire story of these fantastic cars, from the early prototypes built in Shelby's Los Angeles shop to today's Ford-engineered high-tech performers. Written by one of the world's foremost authorities on Shelby automobiles, critically acclaimed author Colin Comer, and with a foreword by Lee Iacocca, the American automobile executive credited with the successful development of the Mustang,

this is the definitive account of the Shelby. When Ford wanted to toughen up its super-successful new Mustang, they approached Carroll Shelby to give it the performance image it so sorely lacked. Beginning with a 1965 "K-Code" 289-cubic-inch-powered Mustang fastback, Shelby applied the same formula that had made his Cobra sports cars such devastating performers both on and off the track: more horsepower, less weight, balanced handling. The GT350 quickly established itself as a bonafide force in SCCA B-Production racing, twisting back roads, and boulevards

alike—setting the course for future Shelby Mustangs, like the big-block GT500. Though those original Shelby Mustangs were done by 1970, Ford dusted off its Shelby relationship in 2006 and has been producing high-performance Ford Mustang Shelybs ever since. This is a must-have read for any fan of American performance cars, whether you're a muscle-era original or a 21st-century stormer.

In the early 1960s, Lee Iacocca—then director of the Ford division at Ford Motor Company—convinced Henry Ford II to produce a sporty four-

seat car aimed at the emerging youth market. That car, essentially a reconfigured and re-skinned Falcon economy car, became the Ford Mustang, and it changed the automotive world like no other car before or since. In *Mustang: Fifty Years*, acclaimed Mustang writer Donald Farr celebrates this unbroken lineage of muscle: its phenomenal first-year sales, the new “pony car” genre it pioneered, and subsequent models that include the Mustang GT, Shelby GT350, Shelby GT500, Super Cobra Jet, Boss 302 and Boss 429—all part of a line of American performance cars that continues on to this day. With 400 photos of the USA’s iconic sports car and released in tandem with the

By the time the 1969 model year rolled around, it was well established that muscle cars were fast and plentiful. Every manufacturer had at least one corner of the showroom where the "go fast" guys could congregate and discuss the merits and time slips of the latest performance offerings. Competition being what it was, the manufacturers were looking for ways to entice potential buyers to choose their product over ever-increasing offerings from the competition. Some manufacturers tried to accomplish this with affordable prices, some tried fancy marketing schemes, and some created a look and a style that

screamed "performance" even when standing still. The 1969 Mach I was Ford's attempt to create a package and a style to match the performance of its recently released and very potent 428-ci Cobra Jet engine package. Displacing the still-available but more conservative GT trim, the Mach I included unique and innovative graphics and mechanical innovations including shaker hood scoops, dual racing mirrors, deluxe interiors, competition suspension, dual chrome exhaust tips, and blacked-out hoods. The result was a wildly popular model that sold more than 70,000 units, compared to slightly more than 5,000 GT models for the year. Each volume in the In Detail Series provides an introduction and

historical overview, an explanation of the design and concepts involved in creating the car, a look at marketing and promotion, an in-depth study of all hardware and available options, and an examination of where the car is on the market today. Also included are paint and option codes, VIN and build tag decoders, as well as production numbers.
