The History of Mustangs The Rosen Publishing Group, Inc There were Mustangs, and then there were Mustangs. Ford wanted its new little Pony Car to appeal to the masses, and in executing that plan, the Mustang could be had in anything from a plain-Jane version with an economical 6-cylinder engine (often referred to as a "secretary ' s car"), all the way up to the sporty GT models with optional 271-hp V-8s. Unfortunately, although road-going Mustangs were considered sporty, they were not officially sports cars, at least according to the Sports Car Club of America (SCCA). And Lee Iacocca knew that on-track performance led to

showroom performance, so he needed to go racing. Enter Carroll Shelby. Shelby worked with the SCCA to modify the Mustang to meet the SCCA's requirements and enter the racing arena. The result was the now-legendary Shelby Mustang. This volume of CarTech's In Detail series covers the 1968 Shelby GT350, GT500, and GT500KR. In 1968, Ford sought to take over much of the process of producing Shelby Mustangs and increased that production dramatically to meet anticipated sales demand, so it was a bit of a transition year. In an effort to appeal to muscle car fans rather than race fans, the cars were losing their edgy race car feel and were becoming more high-end performance road cars with a long list of performance and comfort options including 428 Cobra Jet Engines, automatic transmissions, and air conditioning. They may have no longer been sports cars, but they were now fantastic muscle cars. As in all In Detail Series books, you

get an introduction and historical overview, an explanation of the design and concepts involved in creating the car, a look at marketing and promotion, and an in-depth study of all hardware and available options, as well as an examination of where the car is on the market today. Also included is an appendix of paint and option codes, VIN and build tag decoders, as well as production numbers.

In the early 1960s, Lee Iacocca—then director of the Ford division at Ford Motor Company—convinced Henry Ford II to produce a sporty four-seat car aimed at the emerging youth market. That car, essentially a reconfigured and re-skinned Falcon economy car, became the Ford Mustang, and it changed the automotive world like no other car before or since. In *Mustang: Fifty Years*, acclaimed Mustang writer Donald Farr celebrates this unbroken lineage of muscle: its phenomenal first-year sales, the new “pony car” genre it pioneered, and subsequent models that include the Mustang GT, Shelby GT350, Shelby GT500, Super Cobra Jet, Boss 302 and Boss 429—all part of a line of American performance cars that continues on to this day. With 400 photos of the USA’s iconic sports car

and released in tandem with the Mustang’s 50th anniversary, *Mustang: Fifty Years* is a must on the bookshelf of any gearhead or Ford aficionado.

Mustang and the Pony Car Revolution
Veloce Publishing Ltd
Introduced at the opening of the New York World 's Fair in April 1964, the Ford Mustang was based on mechanicals from the earlier Ford Falcon compact car. It quickly established a new motorcar category—the “pony car”—which was widely copied by domestic and overseas competitors. From the outset, the Mustang represented inspired product planning and design, followed by brilliantly executed marketing. Ford 's

Mustang team effort used every tool in the vehicle-marketing toolbox: clever teases long before the new product went on sale, unprecedented publicity, simple but effective advertising, the stage at the World 's Fair, movie placement, distribution of toy plastic models, and even a replica pedal car for the young drivers of the future. With a measure of luck, it became a classic case of releasing the right product at the right time, and Ford sold one million units in less than two years.

The Complete Book of Mustang CarTech Inc
Of the legendary names in the history of the Ford Mustang, one stands apart: Boss. Originally created to homologate the new Boss 302 engine for SCCA Trans-Am racing, the Boss 302 Mustang was built in limited numbers for the street. Designed by legend Larry Shinoda, the Boss cars were easily distinguished from their less potent stable mates by their unique front and rear spoilers, rear window slats, and the omission

of the standard Mustang's (fake) rear fender brake ducts. Also standard was a shaker hood scoop and bold graphics. Though Mustang performance faded to all-time lows as the 1970s rolled on, there was good news on the way. The pairing of the venerable 302 Windsor engine with the new Fox-body platform for the 1979 Mustang might not have seemed significant at the time, but it was the first edition of what would become a performance institution in the late 20th century: the 5-liter Mustang was an overwhelming force on the streets and tracks through the end of its production in 1995. With no small amount of fanfare, Ford is paying homage to its performance past with the re-introduction of the 5.0 liter powerplant in the Mustang GT for 2011.
