The automotive industry underwent great change in the 1960s and the early 1970s. The continuing trend toward market consolidation, the proliferation of sizes and nameplates, and the "need for speed" characterized this period, loosely labeled as the muscle car era. This is an exhaustive reference work to American made cars of model years 1960-1972. Organized by year (and summarizing the market annually), it provides a yearly update on each make's status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options and their prices, curb weight and dimensions (interior and exterior), paint color choices, changes from the previous year's model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. The book is profusely illustrated with 1,018 photographs.

Advanced Direct Injection Combustion Engine Technologies and Development McFarland

The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973 through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily illustrated with approximately 1,300 photographs.

From 1997, traditional four-wheeled Morgans were modernized with superformed aluminium wings, a stainless steel bulkhead, stainless exhausts, and alterations to the body tub that provided longer doors, an increase in interior width, and a roll hoop under the dashboard. Buying and Maintaining a Modern Traditional Morgan provides practical advice on choosing, running and even modifying one of these exceptional cars, including full technical specifications of each model since 1997. Topics covered in the book include: buying your first Morgan, and the variations available; making the best of the cockpit area and optimizing comfort; staying dry in the rain and protecting the bodywork from wear and tear; Morgan suspension, the practicalities and the modifications available; service and maintenance for the home mechanic and, finally, a practical guide to touring holidays in a Morgan. Includes a Foreword by Steve Morris. Superbly illustrated with 251 colour photographs.
