The yearly volumes of Censored, in continuous publication since 1976 and since 1995 available through Seven Stories Press, is dedicated to the stories that ought to be top features on the nightly news, but that are missing because of media bias and self-censorship. The top stories are listed democratically in order of importance according to students, faculty, and a national panel of judges. Each of the top stories is presented at length, alongside updates from the investigative reporters who broke the stories.

This book presents the papers from the Internal Combustion Engines: Performance, fuel economy and emissions held in London, UK. This popular international conference from the Institution of Mechanical Engineers provides a forum for IC engine experts looking closely at developments for personal transport applications, though many of the drivers of change apply to light and heavy duty, on and off highway, transport and other sectors. These are exciting times to be working in the IC engine field. With the move towards downsizing, advances in FIE and alternative fuels, new engine architectures and the introduction of Euro 6 in 2014, there are plenty of challenges. The aim remains to reduce both CO2 emissions and the dependence on oil-derivate fossil fuels whilst meeting the future, more stringent constraints on gaseous and particulate material emissions as set by EU, North American and Japanese regulations. How will technology developments enhance performance and shape the next generation of designs? The book introduces compression and internal combustion engines' applications, followed by chapters on the challenges faced by alternative fuels and fuel delivery. The remaining chapters explore current improvements in combustion, pollution prevention strategies and data comparisons. In the tradition of monumental Magnum books, this publication brings together an eclectic assortment of work by the finest photographers of our time, capturing a riveting and seductive series of fleeting moments around the world. For half a century, Magnum photographers - through countless commissions and their own personal work - have produced images that comment on the state of the world. In photographing the landscape they are not just spectators but participants, aware that the land itself has been shaped by man, and that the very notion of a landscape depends on a human viewpoint. As each photographer records and interprets a diversity of subject matter to form a unique personal style, the variations on this theme are endless - landscapes of war, of agriculture, of industry, of cities and motorways, of desolation, celebration and tranquillity. The photographs assimilated in this book invite us to rediscover landscape, and urge us to think more profoundly not only about planet earth in its entirety, but about our own place in it.
