For thousands of people, the automobile has been, and yet remains an object of pleasure, pride, status, sports, excitement, emotion and passion. The automobile has been the most important invention of the twentieth century. Not only has it given the hoi polloi freedom, mobility and liberty, it has changed our lifestyle, the way we live and interact, the way we work, the kind of jobs that we do, and has led to an evolution of our cultures. It has changed the cities, the countryside, the way they are conceived, designed and constructed, the way our houses and apartment blocks are configured, as well as the technology involved therein. Post-independence, the automobile

played a very important role in

India's industrial growth, as well as a hero in many Bollywood movies.

The automobile is yet transforming India, as it connects the remotest corners of our vast nation, providing mobility, freedom and jobs to millions. It has acted as an emancipator for women in many parts of the nation, allowing them to go to school and university, commute to work and to the marketplace. With the help of this book, Gautam Sen has traced the history of the automobile in India and the way it has shaped the economy and society here. He has also talked about the evolution of races and bikes in Asia. The riveting story told in the most fascinating anecdotal tone, this book is filled with well-researched facts and details for the lovers of automobiles. The pictures in the book, too, are gorgeous and rare. We Need to Weaken the Mixture Random House

This engaging introduction to random processes provides students with the critical tools needed to design and evaluate engineering systems that must operate reliably in uncertain environments. A brief review of probability theory and real analysis of deterministic functions sets the stage for understanding random processes, whilst the underlying measure theoretic notions are explained in an intuitive, straightforward style. Students will learn to manage the complexity of randomness through the use of simple classes of random processes, statistical means and correlations, asymptotic analysis, sampling, and effective algorithms. Key topics covered include: • Calculus of random processes in linear systems • Kalman and Wiener filtering • Hidden Markov models for statistical inference • The estimation maximization (EM) algorithm • An introduction to martingales and concentration inequalities. Understanding of the key concepts is reinforced through over 100 worked examples and 300 thoroughly tested homework problems (half of which are solved in detail at the end of the book). Business magazine Motorbooks Go on the ride of your life with the racing legend himself \*\*with a thrilling NEW CHAPTER on John 's dramatic 2017 crash\*\* ' Then I was there myself, just

another face in the crowd, watching the bikes fly by. The smells, the noise and the speed were all there for me to experience. It was like a massive injection in my head and it just blew my mind. I knew within seconds that I was going to be a TT racer. I didn't know how or what I was going to have to do to achieve this, and my dad wasn't going to be keen. Everyone around me was aware of the dangers, but from that moment I knew I had to do it.' John McGuinness is one of the all-time giants of road racing, with a huge host of victories to his name. But his easy humour and down-to-earth attitude off the bike have always kept people guessing: what's the truth about the man inside the helmet, that has kept him at the top of such a sport for over 20 years? His autobiography tells the whole story, from his humble beginnings in Morecambe and getting his first bike at the age of 3, to working as a bricklayer and cockle fisherman before deciding to follow his dream, and finally to his many victories in the most dangerous sporting event on the planet. He tells of what it takes to be a champion in such an exacting sport, and to keep winning even though all logic tells you to stop – and when so many of your fellow racers are paying the ultimate price for doing it. This thrilling autobiography gets into the head of the man who stares death in the face, and doesn't even flinch. Triumph Twenty-One to Daytona

With 75 World Championships (riders and manufacturers), 270 Grand Prix victories, and more than 3000 International race wins, MV Agusta's competition record is unequalled amongst Italian motorcycle manufacturers. MV's list of World Champions includes some of the greatest names in the sport, with Carlo Ubbiali, John Surtees, Mike Hailwood, Giacomo Agostini and Phil Read winning multiple times. Alongside the magnificent racing bikes MV produced a wide range of street models, including the exotic four-cylinder bikes based on the Grand Prix racers of the 1950s and early 1960s. After closing in 1977 MV Agusta was resurrected by Cagiva in 1997 and released the Massimo Tamburini-designed four-cylinder F4. Initially 750cc, this evolved into 1000cc and the Brutale series. In 2012 the three-cylinder F3 joined the F4 and a large range of models has grown from these two platforms. With a 50 year passion for Italian motorcycles, The MV Agusta Story tells the full story of MV Agusta, covering all the street and racing models from 1945.
