Register of the University of California IGI Global
This volume contains the papers presented at WS-FM 2007, the 4th International Workshop on Web Services and Formal Methods, held on September 28 and 29, 2007 in Brisbane, Australia. Web service technology aims at empowering providers of services, in the broad sense, with the ability to package and deliver their services by means of software applications available on the Web. Existing infrastructures for Web services - ready enable providers to describe services in terms of structure, access policy and behaviour, to locate services, to interact with them, and to bundle simpler services into more complex ones. However, innovations are needed to seamlessly extend this technology in order to deal with challenges such as managing int-actions with stateful and long-running Web services, managing large numbers of Web services each with multiple interfaces and versions, managing the quality of Web service delivery, etc. Formal methods have a fundamental role to play in shaping innovations in Web service technology. For instance, formal methods help to de?ne and to understand the semantics of languages and protocols that underpin existing infrastructures for Web services, and to formulate features that are found to be lacking. They also provide a basis for reasoning about Web service behaviour, for example to discover individual services that can ful?l a given goal, or even to compose multiple services that can collectively ful?l a goal. Finally, formal analysis of security properties and performance are relevant in many application areas of Web services such as e-commerce and e-business.

American Motorcyclist

This volume contains the proceedings of the fourth edition of the International Symposium on Trustworthy Global Computing (TGC 2008) that was held in Barcelona, Spain, November 3-4, 2008. The Symposium on Trustworthy Global Computing is an international annual venue dedicated to safe and reliable c-putation in global computers. It focuses on providing frameworks, tools, and protocolsfor constructing well-behavedapplications and onreasoningrigorously about their behavior and properties. The related models of computation inc- porate code and data mobility over distributed networks with highly dynamic topologies and heterogeneous devices. This volume contains one invited paper from Gianluigi Zavattaro and co- thors, as well as the revised versions of the 12 contributed papers; these versions take into account both the referees' reports and the discussions that took place during the symposium. The Program Committee selected 12 papers from 26 submissions. Every submission was reviewed by at least three members of the Program Committee. In addition, the Program Committee sought the opinions of additional referees, selected because of their expertise in particular topics. We are grateful to Andrei Voronkov for his EasyChair system that helped us to manage these discussions. We would like to thank the authors who submitted paperstotheconference,the membersofthe ProgramCommittee,andthead- tional reviewersfor their excellent work. We would also like to thank the invited speakers to TGC 2008, Giuseppe Ateniese, Sophia Drossopoulou, and Gianluigi Zavattaro.

Vol. 4 contains cumulative table of cases reported and citator.

Web Services and Formal Methods

Web services provide systems with great flexibility and easier maintenance which result in better ways to communicate and distribute applications. There are good procedures in place for the design, development, and management of Web services; however, there are areas in which Web service adaptation is required. To preserve the loosely coupled approach of Web services, service adaptations should be implemented appropriately. Adaptive Web Services for Modular and Reusable Software Development: Tactics and Solutions includes current research on the area of Web service adaptation while embarking upon the different aspects related to Web services. This collection provides an overview of existing solutions for service adaption in different development scopes as well as covers a wide variety of challenges which emerge. It aims to keep industry professionals as well as academic researchers up to date with the latest research results.
