Presenting a radically different view of the operations of the labor market, in this 1999 book

---

Professors Pryor and Schaffer explain the growing inequality in wages and how those with the least education are being squeezed out of the labor market. Why have wages in those jobs requiring extra-high cognitive skills risen while all other wages have stagnated or fallen? And why are more university graduates taking high-school jobs? The authors of this volume present data revealing that jobs which require a high educational level are increasing more slowly than those with somewhat lower requirements. However such jobs are increasing faster than those requiring still less formal education. Professors Pryor and Schaffer also show how women are replacing men in jobs

which require higher levels of education and, moreover, how those with high cognitive skills are replacing those with lower cognitive skills.

*Who's Not Working* Music of Ireland

This book is part of a series collectively entitled Music of Ireland which brings together a rich repository of solid tunes from the many sessions of Irish music held throughout the British Isles. Its not a definitive collection, nor does it intend to compete with other publications--although naturally some tunes will be found elsewhere. But youll agree that its rare indeed that two written, recorded or

inherited versions are identical. Many alternative titles are given in the index. Some of the tunes are difficult, while many are not. Some are established, some elusive; some sound powerful on the pipes, others sit squarely on the squeezebox. All are worth investigation.

Appropriate for any melody instrument. Chord symbols are included. 32 pages. Mally's and UK product #AM901.
