Modern cars are more computerized than ever.

Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to:

- Build an accurate threat model for your vehicle
- Reverse engineer the CAN bus to fake engine signals
- Exploit vulnerabilities in diagnostic and data-logging systems
- Hack the ECU and other firmware and embedded systems
- Feed exploits through infotainment and vehicle-to-vehicle communication systems
- Override factory settings with performance-tuning techniques
- Build physical and virtual test benches to try out exploits safely

If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

March 2017 Day 2 DODGE THE PROCESS! MISS THE PRODUCT! BASIC SCRIPTURE: HABAKKUK 2: 1-4

Patience is profitable. It's a lost virtue in our culture today. There is so much craze for wealth because people are no more patient. Armed robbery, prostitution or corruption, etc, for example, are the consequences of impatience. The year 2017 is still young! Prayers are being prayed. Planning is going on. There is excitement in the spirit world because the word "EVIDENCE" is being announced worldwide over divine megaphones. But you must realize that there is always a time lag between the day you plant pineapple or apple seed and when you actually harvest the fruit from the full-grown tree. Every divine purpose delivers in stages and there is a time for every purpose on this earth including your own. Don't cage or hinder your destiny by seeking for shortcuts. If you dodge the process - patience, you will miss the product. Habakkuk 2:3 declares: "for the vision is yet for an appointed time; but at the end, it shall speak and not lie. Though it tarry (as the year progresses), wait for it; because it will surely come, it will not tarry." God is bigger than our biggest plans. He is working on your behalf. You need patience to obtain this year. Don't compare yourself with others or look around negatively. God's calendar for you is not the same with your next-door neighbour. Patience mixed with praise and worship will shield you from avoidable mistakes. Meditate also, on Micah 7:7! Your year will end in peace and glory and there shall be EVIDENCE that you serve a living God. The fullness of any vision speaks only at the end. Wait! You will never

end up in shame! Amen! PRAYER POINTS: Take Song 2: Standing on the ...1. In your own words, pray about today's word as led.2. Make a commitment on your knees that you will not panic or hurry or dwell in self - comparison with others.3. Use the Gems For Success page before bedtime today

The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and

Machining is an essential part of high-performance

engine building and stock rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of Engine Building Professional, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valveseat cutting, cam tunnel boring, and a multitude of other services. In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching valvetrain components are also covered. Whether you're an enthusiast engine builder or prospective machining student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures.

The Tongue and Quill has been a valued Air Force resource for decades and many Airmen from our Total Force of uniformed and civilian members have contributed their talents to various editions over the years. This revision is built upon the foundation of governing directives and user's inputs from the unit level all the way up to Headquarters Air Force. A small team of Total Force Airmen from the Air University, the United States Air Force Academy, Headquarters Air Education and Training Command (AETC), the Air Force Reserve Command (AFRC), Air National Guard (ANG), and Headquarters Air Force compiled inputs from the field and rebuilt The Tongue and Quill to meet the needs of today's Airmen. The team put many hours into this effort over a span of almost two years to improve the content, relevance, and organization of material throughout this handbook. As the final files go to press it is the desire of The Tongue and Quill team to say thank you to every Airman who assisted in

making this edition better; you have our sincere appreciation!
