International Statistical Classification of Diseases and Related Health Problems Dundurn

This new edition of WHO's International Classification of Diseases, 10th Revision (ICD-10) has been fully updated for the third time. In addition, the numbering system has changed and now clearly indicates the year that the updates were incorporated. Changes in this new edition include for Volume 1 extensive corrections for Lymphomas and Leukaemias in the neoplasms chapter, clarification and added details for some maternal conditions and

various edits. For Volume 2, main changes include clarification of definitions and rules around maternal cases, causes of pneumonia and extensive editing of the unchanged rules for coding neoplasms in causes of death. For Volume 3, all the new terms and changes made in Volume 1 have been reflected. The ICD is the international standard diagnostic classification for all general epidemiological purposes, many health management purposes and clinical use. These include analysis of the general health situation of population groups and monitoring the incidence and prevalence of diseases, as well as other health problems with respect to variables such as the characteristics and circumstances of the individuals affected, reimbursement, case-mix, resource allocation, quality, patient safety, and guidelines. ICD is used for health information purposes in public health, primary, secondary and tertiary care settings. In particular, it is used to classify diseases, accidents, reasons for encounter, and other health problems recorded on many types of health and vital records including death certificates and health records. The records form the basis for compiling national mortality and morbidity statistics by WHO Member States. Ward's Automotive Yearbook Plunkett Research, Ltd.
