Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago You can save \$2,000 by cutting freight fees and "administrative" charges Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki Toyota Matrix & Pontiac Vibe 2003 thru 2011 Saint Martin's Griffin

[We Beat the Street](#) Haynes Manuals N. America, Incorporated

The mechanical engineering curriculum in most universities includes at least one elective course on the subject of reciprocating piston engines. The majority of these courses today emphasize the application of thermodynamics to engine efficiency, performance, combustion, and emissions. There are several very good textbooks that support education in these aspects of engine development. However, in most companies engaged in engine development there are far more engineers working in the areas of design and mechanical development. University studies should include opportunities that prepare engineers desiring to work in these aspects of engine development as well. My colleagues and I have undertaken the development of a series of graduate courses in engine design and mechanical development. In doing so it becomes quickly apparent that no suitable textbook exists in support of such courses. This book was written in the hopes of beginning to address the need for an engineering-based introductory text in engine design and

mechanical development. It is of necessity an overview. Its focus is limited to reciprocating-piston internal-combustion engines – both diesel and spark-ignition engines. Emphasis is specifically on automobile engines, although much of the discussion applies to larger and smaller engines as well. A further intent of this book is to provide a concise reference volume on engine design and mechanical development processes for engineers serving the engine industry. It is intended to provide basic information and most of the chapters include recent references to guide more in-depth study.

[Travel & Leisure](#) Springer Science & Business Media The book that helped spark the retro craze for fifties architecture and introduced the term googie to the world is back! First published by Chronicle in 1986, this key survey of mid-century coffee shop and commercial architecture is still the standard work on the subject Google Redux is a thoroughly revised and expanded edition of the classic and perennial top-selling book that rekindled the craze for 1950s coffee shop and commercial architecture. Long derided by critics as popular folly, the style – so named after John Lautner's eccentric Los Angeles coffee shop – was emblematic of Southern California's car-oriented architecture. By the time of the first edition's debut, these buildings were being demolished by the score. Alan Hess' 1985 Chronicle book did much not only to educate, legitimize, and popularize the style that characterized this endangered architecture, but it helped spark a resurgence of interest into mid-century modern design. Completely revised and significantly expanded in both text and images (some of them recently unearthed for this edition), this redesigned package features is still an entertaining and informative look at the rise, fall, and resurgence of the commercial architecture that changed the American landscape. Includes a greatly expanded guided tour of the iconic buildings in Southern California.

[The Ladies' Home Journal](#) Chronicle Books Updated for 2005, this guide contains authoritative evaluations of more than 150 new 2005-model of cars, minivans, and sport-utility vehicles. National Geographic Dundurn Uplifting and inspiring, this true story about how three friends came together and encouraged one another to achieve great success will speak to young readers everywhere. "All readers will be riveted by the profoundly inspirational stories and personal, intimate voices that discuss big mistakes and complicated emotions, including 'survivor guilt' for choosing a different path from friends and family." —Booklist Growing up on the rough streets of Newark, New Jersey, Rameck, George, and Sampson could easily have followed their childhood friends into drug dealing, gangs, and prison. But when a presentation at their school made the three boys aware of the opportunities available to them in the medical and dental professions, they made a pact among themselves that they would become doctors. It took a lot of determination—and a lot of support from one another—but despite all the hardships along the way, the three succeeded. Retold with the help of an award-winning author, this younger adaptation of the adult hit novel *The Pact* is a hard-hitting, powerful, and inspirational book that will speak to young readers everywhere.

[Lemon-Aid New and Used Cars and Trucks 2007 – 2017](#) Dundurn Offers advice for prospective buyers of cars and trucks, reveals information on secret warranties and

confidential service bulletins, and tells how to complain and get results.

Good Housekeeping e-artnow sro The process of buying a new car is a stress-filled prospect for most of us. How big a car do we really need? How flashy a look do we truly want?
