Recording Secrets for the Small Studio  
New York : Grossman

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved

it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Pontiac's Greatest Decade, 1959-1969: The Wide Track Era covers a specific timeline in Pontiac's history. A decade when it jumped from middle of the sales pack to hold the coveted number three position behind Chevrolet and Ford. Pontiac never gave it up from 1961 until 1969. The incredible leadership of Bunkie Knudsen, Bob Estes, and

---

John DeLorean helped propel Pontiac into this esteemed position. Starting with the Wide Track 1959 Catalina, in rapid succession came the 1961 Tempest, the 1962 Grand Prix, the 1964 GTO (which launched the musclecar era), the 1967 Firebird, and the 1969 Grand Prix. Pontiac's Greatest Decade, The Wide Track Era, captures the energy and the dynamic force of personality that ignited the spirit of Pontiac Motor Division and all of its employees, from designers and engineers to assembly line workers and dealers. No other book on Pontiac's history has captured the essence of the Wide Track era. Along with never-before-seen photographs, there are evaluations of the products and significant milestones in the company's history from 1959 to 1969. Production and pricing information are also included.

The General Motors Corporation will be remembered as one of the most important industrial organizations of the Twentieth Century. Although primarily known for its automotive products, it was best known in the surface passenger transportation industry for its intercity highway and urban transit buses. After the end of World War II, it improved its

---

products and gained a virtual monopoly in the bus building business. The Truck & Coach Division of General Motors developed many designs that became industry standards.

Arguably, the most notable design was the series known as the "New Look" bus for transit and suburban service. It first appeared in 1959, and the design was quite a radical departure from the models GM had produced since 1940. The New Look design continued in production basically unchanged for over 27 years, and didn't receive a face-lift until 1995 (that being the Classic produced in Canada). In many ways, it truly was the first "ADB", Advanced Design Bus. This is the story of how the New Look bus came to be, a discussion of its construction, and the many variations that comprised the New Look series.

This first book of its kind tells the behind-the-scenes story of the incredibly illegal Cannonball rally. This best seller is now available in paperback! In the early 1970s, Brock Yates, senior editor of Car and Driver Magazine, created the now infamous Cannonball Sea-to-Shining-Sea Memorial Trophy Dash; a flat out, no-holds-barred race from New York City to Redondo Beach, California. Setting out to prove that well trained drivers could safely navigate the American highways at speeds in excess of the posted limits, Mr. Yates created a spectacle reminiscent of the glory days of the barnstorming pilots. Filled with fascinating unpublished stories, nostalgic and modern-day photographs, inside information and hilarious stories from this outrageous and incredibly immoral rally. This volume presents a collection of 38 articles, interviews, and speeches describing many aspects of the U.S. Marine Corps' participation in Operation Enduring Freedom from 2001 to 2009. This work is intended to serve as a general overview and provisional reference to inform both Marines and the general public until the History Division completes monographs dealing with major Marine Corps operations during the campaign. The accompanying annotated bibliography provides a detailed look at selected sources that currently exist until new scholarship and archival materials become available. From the Preface - From the outset, some experts doubted that the U.S. Marines Corps would play a major role in Afghanistan given the landlocked nature of the battlefield.

---

Naval expeditionary Task Force 58 (TF-58) commanded by then-Brigadier General James N. Mattis silenced naysayers with the farthest ranging amphibious assault in Marine Corps/Navy history. In late November 2001, Mattis' force seized what became Forward Operating Base Rhino, Afghanistan, from naval shipping some 400 miles away. The historic assault not only blazed a path for follow-on forces, it also cut off fleeing al-Qaeda and Taliban elements and aided in the seizure of Kandahar. While Corps doctrine and culture advocates Marine employment as a fully integrated Marine air-ground task force (MAGTF), deployments to Afghanistan often reflected what former Commandant General Charles C. Krulak coined as the "three-block war." Following TF-58's deployment during the initial take down of the Taliban regime, the MAGTF made few appearances in Afghanistan until 2008. Before then, subsequent Marine units often deployed as a single battalion under the command of the U.S. Army Combined

Joint Task Force (CJTF) to provide security for provincial reconstruction teams. The Marine Corps also provided embedded training teams to train and mentor the fledgling Afghan National Army and Police. Aviation assets sporadically deployed to support the U.S.-led coalition mostly to conduct a specific mission or to bridge a gap in capability, such as close air support or electronic warfare to counter the improvised explosive device threat. From 2003 to late 2007, the national preoccupation with stabilizing Iraq focused most Marine Corps assets on stemming the insurgency, largely centered in the restive al-Anbar Province. As a result of the North Atlantic Treaty Organization (NATO) taking over command of Afghan operations and Marine Corps' commitments in Iraq, relatively few Marine units operated in Afghanistan from late 2006 to 2007. Although Marines first advocated shifting resources from al-Anbar to southern Afghanistan in early 2007, the George W. Bush administration delayed the Marine proposal for fear of losing the

---

gains made as a result of Army General David H. Petraeus' "surge strategy" in Iraq. By late 2007, the situation in Afghanistan had deteriorated to the point that it inspired Rolling Stone to later publish the story "How We Lost the War We Won." In recognition of the shifting tides in both Iraq and Afghanistan, the Bush administration began to transfer additional resources to Afghanistan in early 2008. The shift prompted senior Marines to again push for a more prominent role in the Afghan campaign, even proposing to take over the Afghan mission from the Army. . . .

Most innovations in the car industry are based on software and electronics, and IT will soon constitute the major production cost factor. It seems almost certain that embedded IT security will be crucial for the next generation of applications. Yet whereas software safety has

become a relatively well-established field, the protection of automotive IT systems against manipulation or intrusion has only recently started to emerge. Lemke, Paar, and Wolf collect in this volume a state-of-the-art overview on all aspects relevant for IT security in automotive applications. After an introductory chapter written by the editors themselves, the contributions from experienced experts of different disciplines are structured into three parts. "Security in the Automotive Domain" describes applications for which IT security is crucial, like immobilizers, tachographs, and software updates. "Embedded Security Technologies" details security technologies relevant for automotive applications, e.g., symmetric and asymmetric cryptography, and wireless security. "Business Aspects of IT Systems in Cars" shows the need

---

for embedded security in novel applications like location-based navigation systems and personalization. The first book in this area of fast-growing economic and scientific importance, it is indispensable for both researchers in software or embedded security and professionals in the automotive industry. *Quattro* Dorling Kindersley Ltd (Book). *Progressive Drumming Essentials* is a collection of material originally written for *Modern Drummer* magazine plus extensive additional content. Inklove is a collection of narrative poems based on millennial love. It is an expression of mixed feelings. The narrator is stuck in the middle of her mind, heart and body and the influence around her is embraced with the traditional way of making love and being loved. The narrator is not very traditional when it comes to making love, she wants to be with someone and she ends up being with someone else. Her heart is not willing to reveal something that she hides. Her mind is exhausted in frustration of not being able to be who she is and her body

wants to dominate its own fantasy. So, what should the narrator do in such situation?

Allow the heart to reveal its truth or be exhausted forever or let the body dominate?
