Install the manual tensioner. Turn the tensioner adjusting bolt in by hand until resistance is felt. Start the engine. Back off the tensioner bolt until you start to hear cam chain noise, then turn the bolt in until the noise disappears.)It only takes about about 4 lbs of pressure against the tensioner blase to keep the chain from making noise.

hello all so i traded my blown up trx450 for a 400ex bored to 440 runs and rides great plenty of power came with a

spare motor and 2 good 440 cylinders and pistons. but it has a slight tick i checked the timing chain tensioner and its maxed so i assume it needs a timing chain no big deal. but my question is will a manual chain adjuster allow me to take the slack out and quiet up the chain ...

[Honda TRX Forum - 400ex manual timing chain tensioner](#)

Manual tensioners are by far a better way to go. Once set, they almost never need adjusting. OEM 'automatic' ones tend to over tighten the chain, causing it to wear out prematurely and are the cause of many 4S 'skipping a tooth' on a cam and bending a valve. The issue with a manual one, is people do not understand how to adjust them. Simply to do really.

[Manual Vs. Mechanical Cam Chain Tensioner - General Dirt ...](#)

Sure enough, timing was way far out, timing chain incredibly loose. So for fun I re-tensioned the timing chain and re timed it, got about 120lbs of compression, pretty low. I cannot get the chain very tight but the the tensioner seems to work fine, the chain guides don't look very worn.
