"Fitrah: Man's  
Natural  
Disposition"  
is a  
translation of  
the Persian  
book "Fi?rat"  
by the great  
Muslim thinker  
and reformer,  
Ayatollah  
Murtada  
Mutahhari.  
"Fitrah" is  
the theme of a  
10-session  
lecture series  
given the  
martyred  
thinker in  
1976-77. With  
ample  
citations from  
the Qur'an and  
other

---

traditional Islamic sources, Mutahhari discusses the concept of 'fitrah' or man's natural disposition. The author does not confine himself to Islamic references as he continuously engages with the views of a wide range of philosophers including Plato, William James, Russell, Nietzsche, Marx, Feuerbach, Auguste Comte, Spencer, Will Durant, and Durkheim, among others. Mutahhari's ontological discussion covers a range of issues, including the literal and technical meaning of 'fitrah', sacred inclinations, love and worship, and the evolution of human originality. He also examines materialism and provides a theistic approach to some issues pertaining to the theories on the origin of religion, the evolution of human society, intrinsic and acquired guidance, and intuitive and sensory dispositions. This book lays a significant interconnected and deep foundation in Islamic theology and an understanding of human psychology, sociology and anthropology fully supported by the holy Quran, ahadith, logic and philosophy. The reader will leave with a holistic understanding of Islam and a true connection with the Almighty (SWT) through one own self.

**An Investigation of Land Cover and Land Use Change in Stung Chrey Bak Catchment, Cambodia**  
Sams Technical Publishing  
Porting heads is an art and science. It takes a craftsman's touch to shape the surfaces of the head for the optimal flow characteristic s and the best performance. Porting demands the right tools,

skills, and application of knowledge. Few other engine builders have the same level of knowledge and skill porting engine heads as David Vizard. All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Starting with the basic techniques up to more advanced techniques, you are shown how

---

to port iron and aluminum heads as well as benefits of hand and CNC porting. You are also shown how to build a high-quality flow bench at home so you can test your work and obtain professional results. Vizard shows how to optimize flow paths through the heads, past the valves, and into the combustion chamber. The book covers blending the bowls, a basic porting procedure, and also covers pocket porting, porting the intake runners, and many

advanced procedures. These advanced procedures include unshrouding valves, porting a shortside turn from the floor of the port down toward the valve seat, and developing the ideal port area and angle. All of these changes combine to produce optimal flow velocity through the engine for maximum power. **Executive Calculator Guidebook** This resource explains how to rebuild and modify transmissions

from both rear- and front-wheel-drive cars. It explains the principles behind the workings of all manual transmissions, and helps readers understand what they need to do and know to rebuild their own transmissions. Includes how to determine what parts to replace; how and why to replace certain seals, spacers,

---

springs,  
forks, and  
other parts;  
and where to  
find (and how  
to measure)  
the  
specification  
s for each  
particular  
transmission.
