They're wrong for each other, but nothing has ever felt so right. Uptown girl Emmaline Claiborne needs a man, and not just any man. She needs the kind of man who can make her lying, cheating, no-good ex-boyfriend insane with jealousy. The same ex-boyfriend who is now engaged to her sister, and whose extravagant wedding she must suffer through in just three weeks' time. She selects the perfect candidate through an online dating app, but instead of the smooth, sophisticated software magnate she expects, a rugged cowboy shows up instead. He's the complete opposite of everything Emma is looking for. In fact, he's exactly the kind of man she swore to her Texas ranching family she would never fall for. Which makes Cort Channing kinda perfect. Only before the weekend is over, Emma finds herself wishing she could keep her fake boyfriend, spurs, chaps, and all. Can this committed city girl take the biggest chance of her life, and swipe right for a cowboy?

With all of the expert-authored content that made previous editions indispensable references for students and practitioners alike, this third edition of *The Art and Science of Brief Psychotherapies: A Practitioner's Guide* has been updated to reflect this rapidly changing field. Most chapters include new material that documents recent developments within existing models, and new chapters tackle topics that include the following: Multicultural practice Mentalizing Motivational interviewing Dialectical behavior therapy Telepsychiatry Internet-based interventions All chapters summarize the ideas underlying each modality, the evidence for effectiveness, and the techniques and interventions central to each. In this edition, the DVD of videos has been replaced with 40 updated streaming videos -- available on desktop and mobile devices -- that show experienced practitioners engaged in a range of brief therapies, allowing for a deeper and richer learning experience for readers. In a national and global environment of limited economic resources and multiple demands on patients' time, short-term treatment modalities are increasingly important. Integrating theory, research, and step-by-step procedures, *The Art and Science of Brief Psychotherapies* is an ideal introduction to the range of short-term therapies for psychiatry residents, psychology interns, social work students, and experienced practitioners looking to broaden their practice.

The past 30 years have seen the emergence of a growing desire worldwide that positive actions be taken to restore and protect the environment from the degrading effects of all forms of pollution—air, water, soil, and noise. Because pollution is a direct or indirect consequence of waste, the seemingly idealistic demand for “zero discharge” can be construed as an unrealistic demand for zero waste. However, as long as waste continues to exist, we can only attempt to abate the subsequent pollution by converting it to a less noxious form. Three major questions usually arise when a particular type of pollution has been identified: (1) How serious is the pollution? (2) Is the technology to abate it available? and (3) Do the costs of abatement justify the degree of abatement achieved? This book is one of the volumes of the *Handbook of Environmental Engineering* series. The principal intention of this series is to help readers formulate answers to the last two questions above. The traditional approach of applying tried-and-true solutions to specific pollution problems has been a major contributing factor to the success of environmental engineering, and has accounted in large measure for the establishment of a “methodology of pollution control.” However, the realization of the ever-increasing complexity and interrelated nature of current environmental problems renders it imperative that intelligent planning of pollution abatement systems be undertaken.

The Doctor Who Has No Closure Entangled: Crush

Newton's mathematical researches during the last five years of his stay in Cambridge before leaving in April 1696 to take up his duties at the Mint in London have three main centres of interest: methods of fluxions and series, classical pure geometry, and Cartesian analytical geometry. Part 1 reproduces Newton's advances at this time in further extending the techniques of his combined calculus of fluxions and fluent, and of expansion into infinite series. Part 2 gives publication of Newton's lengthy excursions in the early 1690s into the modes of geometrical analysis used by the 'ancient' geometers, based - by way of Commandino's Latin translation - on the account of this little understood field of the Greek 'topos analuomenos' which was given by Pappus in the prolegomenon to the seventh book of his *Mathematical Collection*. Part 3 gives prominence to the final text of the *Enumeratio Linearum Tertii Ordinis* which Newton put together in June 1695.

Escorted by a prince, my obsession led me to the villain's lair, with no hope for rescue. Trapped inside his greenhouse, our once upon a time began with a flower. More accurately, with a scent that captivated me. I signed my soul over to the man who represented my sinister nightmares. The one known to belong to the cruel shadows, who offered me my perfumer's dream. He demanded the impossible: the missing piece of his kingdom of sins. I stalked the impossible: his humanity. This is our dark tale. When beauty met ugliness. When light met darkness. When heaven met hell. A tale of obsession.
