Ford FE Stroker Build - Engine Builder Magazine

Fully redesigned, the Shelby 427 Alloy FE block is 45 percent lighter, yet stronger than the factory cast iron version. It retains original factory engine mounting bosses and bell housing bolt pattern, making it a bolt-in replacement for 390/427/428 cast iron Fe blocks. The Shelby FE block is fully CNC machined and comes ready for

engine assembly.

This Ford 427 FE V8 engine project is now offered at no reserve in Mansfield, Texas with a bill of sale. The Ford FE 427 block features cross-bolted main caps, retains a standard bore, and is cast "C5AE-G." The block was tested and measured by Arlington Automotive Machine in Arlington, Texas in February 2017.

Ford FE Engines: The Complete
History
1963 427 - This engine has
been rebuilt recently,
however it was left outside
and has some rust. The block
has been bored.030" over. The
cylinders look good, except
that there is rust in a
couple of them. In addition,
the block has a repair in the
lifter valley that shouldnt
affect anything.
Shelby Engines: Carroll Shelby 427
FE Aluminum Block ...

Most notably, the FE 427 powered
Ford GT40s to four consecutive
LeMans wins from 1966 to 1969, an
epic achievement for Ford and the
FE engine. So here is the FE
engine legacy: It was the engine
that was in the most famed Ford
racing vehicles of the time in
each form of motorsports- NASCAR,
the Cobra, the GT40, and the
Thunderbolt.

427 Ford FE Stroker Crate Engine: FE427-HR-C1

By 1965, the 427 race engine
employed a "side-oiler" block
configuration (sending oil to
the crankshaft first, then to
the camshafts and valvetrain
second - the direct opposite of
the earlier "top-oiler"
version), and was available
with low-riser, mid-riser, or
high-riser aluminum intake
manifolds, topped by either
single or double four-barrel
carburetors.

Survival FE Engine Kits

Most FE engines came with cast-
iron cranks, and save for the
'65-67 427 engine with the
"LeMans" steel cranks, the easiest

way to get a forged steel crank is to pluck one from one of the heavy-duty...

The 427 side-oiler engine belongs to the Ford FE family, arguably the peak of Ford's big cubic inch V8s. The FE was available from 1958 to '76 in displacements from 330 to 428 cubic inches. These engines took the place of the outgoing Y-block engine which only ran for a few years after replacing the flathead V8.
