n this extremely comprehensive overview of airlift and air mobility, Colonel Miller shows how the worldwide orientation of American foreign policy, the numerous threats to free-world interests, and the speed and complexity of modern warfare have combined with political and resource constraints to produce today's airlift doctrine and force structure. Airlift is the movement of goods and people to where they are needed, when they are needed there. Since the 1920s there has been an evolving awareness and articulation of how to best organize, train, and equip airlift forces for that mission. The worldwide orientation of American foreign policy, the numerous threats to free world interests, and the speed and complexity of modern warfare have combined with political and resource constraints to produce today's airlift doctrine and force structure. Colonel Miller's study traces these many interrelationships to discover what critical airlift decisions were made, why they were made, and what they may mean in the future. Airlift is the backbone of deterrence. A properly structured and equipped airlift force is critical to the successful execution of the national military strategy. How we think about airlift and how we translate those thoughts into a meaningful expression of how to develop, deploy, and employ airlift forces is vital to the national defense. Colonel Miller's study is a definitive step in that important process.

Getting the Message Through, the companion volume to Rebecca Robbins Raines' Signal Corps, traces the evolution of the corps from the appointment of the first signal officer on the eve of the Civil War, through its stages of growth and change, to its service in Operation DESERT SHIELD/DESERT STORM. Raines highlights not only the increasingly specialized nature of warfare and the rise of sophisticated communications technology, but also such diverse missions as weather reporting and military aviation. Information dominance in the form of superior communications is considered to be sine qua non to modern warfare. As Raines ably shows, the Signal Corps--once considered by some Army officers to be of little or no military value--and the

communications it provides have become integral to all aspects of military operations on modern digitized battlefields. The volume is an invaluable reference source for anyone interested in the institutional history of the branch.

You don't need to memorize evangelical formulas or answers. You just have to be willing to ask. There was something different about the way Jesus communicated with the lost: He didn't force answers upon people, He asked questions. So why don't we? Following Christ's lead, Randy Newman has been using a questioning style of evangelism for decades. In this provocative book, he provides practical insights to help Christians engage others in meaningful spiritual conversations. He challenges us to examine how we think about people, their questions, and our crucial message.

This second edition includes a new preface reflecting on the popularity of this perennial best seller and what its success has taught Newman about the effectiveness of this extraordinary method. "Distilled out of over twenty years of personal evangelism, this book reflects both a deep grasp of biblical theology and a penetrating compassion for people--and finds a way forward in wise, probing questions. How very much like the Master Himself!" --D. A. Carson, Trinity Evangelical Divinity School "Questioning Evangelism steps outside the boundaries of evangelism as usual and tackles the tougher issues of our modern day." --Mitch Glaser, Chosen People Ministries

American Sniper No Logo Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 193 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Press accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information,

including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.

One of the most beloved novels of all time, Colleen McCullough's magnificent saga of dreams, struggles, dark passions, and forbidden love in the Australian outback has enthralled readers the world over. The Thorn Birds is a chronicle of three generations of Clearys—an indomitable clan of ranchers carving lives from a beautiful, hard land while contending with the bitterness, frailty, and secrets that penetrate their family. It is a poignant love story, a powerful epic of struggle and sacrifice, a celebration of individuality and spirit. Most of all, it is the story of the Clearys' only daughter, Meggie, and the haunted priest, Father Ralph de Bricassart—and the intense joining of two hearts and souls over a lifetime, a relationship that dangerously oversteps sacred boundaries of ethics and dogma.

The #1 New York Times bestselling memoir of U.S. Navy Seal Chris Kyle, and the source for Clint Eastwood's blockbuster, Academy-Award nominated movie. "An amazingly detailed account of fighting in Iraq--a humanizing, brave story that's extremely readable." —PATRICIA CORNWELL, New York Times Book Review "Jaw-dropping...Undeniably riveting." —RICHARD ROEPER, Chicago Sun-Times From 1999 to 2009, U.S. Navy SEAL Chris Kyle recorded the most career sniper kills in United States military history. His fellow American warriors, whom he protected with deadly precision from rooftops and stealth positions during the Iraq War, called him "The Legend"; meanwhile, the enemy feared him so much they named him al-Shaitan ("the devil") and placed a bounty on his head. Kyle, who was tragically killed in 2013, writes honestly about the pain of war—including the deaths of two close SEAL teammates—and in moving first-

person passages throughout, his wife, Taya, speaks openly about the strains of war on their family, as well as on Chris. Gripping and unforgettable, Kyle's masterful account of his extraordinary battlefield experiences ranks as one of the great war memoirs of all time.

The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community. Bench Book Routledge

WINNER OF THE NATIONAL BOOK CRITICS CIRCLE AWARD, THE LOS ANGELES TIMES BOOK PRIZE, THE MARK LYNTON HISTORY PRIZE, THE AMERICAN HISTORY BOOK PRIZE Book Four of Robert A. Caro's monumental *The Years of Lyndon Johnson* displays all the narrative energy and illuminating insight that led the *Times* of London to acclaim it as "one of the truly great political biographies of the modern age. A masterpiece." *The Passage of Power* follows Lyndon Johnson through both the most frustrating and the most triumphant periods of his career—1958 to 1964. It is a time that would see him trade the extraordinary power he had created for himself as Senate Majority Leader for what became the wretched powerlessness of a Vice President in an administration that disdained and distrusted him. Yet it was, as well, the time in which the presidency, the goal he had always pursued, would be thrust upon him in the moment it took an assassin's bullet to reach its mark. By 1958, as Johnson began to maneuver for the presidency, he was known as one of the most brilliant politicians of his time, the greatest Senate Leader in our history. But the 1960 nomination would go to the young senator from Massachusetts, John F. Kennedy. Caro gives us an unparalleled account of the machinations behind both the nomination and Kennedy's decision to offer Johnson the vice presidency, revealing the extent

of Robert Kennedy's efforts to force Johnson off the ticket. With the consummate skill of a master storyteller, he exposes the savage animosity between Johnson and Kennedy's younger brother, portraying one of America's great political feuds. Yet Robert Kennedy's overt contempt for Johnson was only part of the burden of humiliation and isolation he bore as Vice President. With a singular understanding of Johnson's heart and mind, Caro describes what it was like for this mighty politician to find himself altogether powerless in a world in which power is the crucial commodity. For the first time, in Caro's breathtakingly vivid narrative, we see the Kennedy assassination through Lyndon Johnson's eyes. We watch Johnson step into the presidency, inheriting a staff fiercely loyal to his slain predecessor; a Congress determined to retain its power over the executive branch; and a nation in shock and mourning. We see how within weeks—grasping the reins of the presidency with supreme mastery—he propels through Congress essential legislation that at the time of Kennedy's death seemed hopelessly logjammed and seizes on a dormant Kennedy program to create the revolutionary War on Poverty. Caro makes clear how the political genius with which Johnson had ruled the Senate now enabled him to make the presidency wholly his own. This was without doubt Johnson's finest hour, before his aspirations and accomplishments were overshadowed and eroded by the trap of Vietnam. In its exploration of this pivotal period in Johnson's life—and in the life of the nation—*The Passage of Power* is not only the story of how he surmounted unprecedented obstacles in order to fulfill the highest purpose of the presidency but is, as well, a revelation of both the pragmatic potential in the presidency and what can be accomplished when the chief executive has the vision and determination to move beyond the pragmatic and initiate programs designed to transform a nation. It is an epic story told with a depth of detail possible only through the peerless research that forms the foundation of Robert Caro's work, confirming Nicholas von Hoffman's verdict that "Caro has changed the art of political biography."

Of all the plants men have ever grown, none has been praised and denounced as often as marijuana (*Cannabis sativa*). Throughout the ages, marijuana has been extolled as one of man's greatest benefactors and cursed as one of his greatest scourges. Marijuana is undoubtedly a herb that has been many things to many people. Armies and navies have used it to make war, men and women to make love. Hunters and fishermen have snared the most ferocious creatures, from the tiger to the

shark, in its herculean weave. Fashion designers have dressed the most elegant women in its supple knit. Hangmen have snapped the necks of thieves and murderers with its fiber. Obstetricians have eased the pain of childbirth with its leaves. Farmers have crushed its seeds and used the oil within to light their lamps. Mourners have thrown its seeds into blazing fires and have had their sorrow transformed into blissful ecstasy by the fumes that filled the air. Marijuana has been known by many names: hemp, hashish, dagga, bhang, loco weed, grass—the list is endless. Formally christened *Cannabis sativa* in 1753 by Carl Linnaeus, marijuana is one of nature's hardiest specimens. It needs little care to thrive. One need not talk to it, sing to it, or play soothing tranquil Brahms lullabies to coax it to grow. It is as vigorous as a weed. It is ubiquitous. It flourishes under nearly every possible climatic condition.
