The exponential increase in the development of technology coupled with the customers' immense desire to possess the newest technological products makes for truncated product lifespans, which instigates a substantial upsurge in their rate of disposal. Attempts have been made to establish specialized product recovery facilities with the intention of diminishing the volume of accumulated waste delivered to landfills using product recovery procedure such as remanufacturing. The economic benefits produced by remanufacturing also portray the role of product recovery in a more attractive light. The quality of a remanufactured product is uncertain for some consumers. Therefore, these consumers possess insecurities in deciding whether or not the remanufactured products will render the same expected performance. This ambiguity regarding a remanufactured product could possibly result in the consumer deciding against its purchase. With such consumer apprehension, remanufacturers often seek market mechanisms that provide reassurance as to the stable durability that these products still maintain. One strategy that the remanufacturers often use is the utilization of the premise of offering product warranties with preventive maintenance on their products. This book is concerned with the practice and theory of warranty management and preventive maintenance, particularly in relation to remanufactured products' warranties. Models developed in this book can be used for making the right decisions in offering renewable, nonrenewable, one and two dimensional warranty policies, and for managerial decision in considering maintenance contracts or outsourcing maintenance for remanufactured components and products. Features Discusses a variety of warranty policies and preventive maintenance of remanufactured products (first book to do so) Presents mathematical models and applications for warranty policies using examples and simulation results Considers cost and optimization problems from the remanufacturer's and buyer's points of views Provides a foundation for academicians interested in building models in the area of warranty and preventive maintenance analysis of remanufactured products Offers the essential methodology needed by practitioners involved with warranty and preventive maintenance analysis, along with extensive references for further research

Motor Boat Kluwer Law International B.V.

Beginning in 1956 each vol. includes as a regular number the Blue book of southern progress and the Southern industrial directory, formerly issued separately.

Popular Mechanics

Veloce Classic Reprint of the only book dedicated to the Type

46 & 50 Bugattis. The book features over 200 period plates, many rare and previously unpublished, showing a galaxy of superb coachbuilt and standard bodies on T46 and T50 chassis as well as much mechanical detail.

Report of the Federal Trade Commission on the Causes of High Prices of Farm Implements

Nations in all regions of the world today share

a common international sales law, The United

Nations Convention on Contracts for the

International Sale of Goods (CISG). The

Convention was prepared by the United Nations

Commission on International Trade Law

(UNCITRAL) and adopted by a diplomatic

conference on 11 April 1980. Since then, the

number of countries that have adopted the CISG

account for over two-thirds of all world trade.

The area of international sales law continues

to grow as technology and development take us

to a global economy. As such, the study of the

CISG has become an integral component of this

ever-growing area of international commercial

law. The Review of the CISG is published once

yearly and features articles written by

prominent legal scholars in the field of

international sale of goods from around the

world. In addition to scholarly writings

analyzing the various articles of the CISG, the

book seeks to compile translations of recent

decisions as well as commentaries of notable

cases relating to the CISG. The Review of the

CISG provides both a forum for legal discussion

within the international legal community in the

area of international sales law and as an

authoritative source of reference for

international scholars.
