Earth Day celebrates our beautiful planet and calls us to act on its behalf. Some people spend the day planting flowers or trees. Others organize neighborhood clean-ups, go on nature walks, or make recycled crafts. Readers will discover how a shared

holiday can have multiple traditions and be celebrated in all sorts of ways.

Choppers Wolfgang Productions Chopper owners take pride in turning their motorcycles into one-of-a-kind machines. To personalize their rides, they remove unnecessary parts from the motorcycles and add everything from sissy-bars and ape-hanger handlebars to chrome parts and crazy paint jobs. In the end chopper owners create some of the coolest bikes on the planet. In this book you will discover where the term chopper comes from, what

kinds of motorcycles make the best choppers, the difference between a chopper and a bobber, and where you can go to see classic and modern choppers.

The Rush to Ruin Penguin
How to Build a Cheap Chopper was originally written to give chopper builders of the day a way to build cool, functional choppers for cheap money. Instead of building bikes out of a catalogue, readers were

encouraged to combine a donor bike with an aftermarket frame. With a Sportster or Metric bike as a foundation, and a hard-tail frame, a complete bike could be assembled for less than \$5,000, sometimes much less. Today, there's a whole new generation of riders looking to build simple, functional, unique choppers and bobbers based on everything from a 200cc Honda to the old classic Shovelhead or Panhead engines. No matter which drivetrain they choose, there remains the need to build bikes that work, bikes that are safe to ride, bikes that are fun! **How to Build a Cheap Chopper-** Revised starts with a look at the basics. The first chapters cover brakes, drivetrains, and frame geometry. The second half of the book shows readers how to actually assemble a bike. Four start-to-finish assemblies done at professional shops take the reader from a pile of parts to a finished, running motorcycle.

Motorcycles are mythic, far more than mere transportation, but some are in a class of their own, truly legendary machines. There are the Triumphs: James Dean's, Marlon Brando's in *The Wild Ones*, the one Steve McQueen took over the fence in *The Great Escape*. There are Evel Knievel's and Elvis's Harleys, the Easy Rider Stars 'n' Stripes bike, and T. E. Lawrence's Brough Superior SS100; Von Dutch's Condor, Craig Vetter's *Mystery Ship*, and Mike Hailwood's Honda RC162. These are just some of the machines that have made motorcycle history, and that make this book a feast for the eyes and a fact-filled odyssey for the motorcycle aficionado. Illustrated with commissioned photographs and historical images, the book profiles the bikes--not just the models but the actual motorcycles--that have achieved legendary status in the last century. Their stories, told here in detail for the first time, make up the story of the motorcycle in American culture. WALNECK'S CLASSIC CYCLE

TRADER, OCTOBER 2004

Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides

for dirt, street, and supermoto--promising a solution to virtually any handling problem.
