Sodium hypochlorite has long been recognized for its effectiveness as an antiseptic and disinfectant, but its practical use in medicine had been limited due to its reduced stability. However, it has been shown that the method of manufacture can make the vital difference: The ExSept solutions (Amuchina) discussed in this publication differ from other commercially manufactured solutions insofar as they are produced with the help of electrolysis, the result being a highly effective antimicrobial with very good biocompatibility. The papers in this volume concentrate on the experiences made with ExSept solutions in dialysis applications. They provide a sound understanding of how electrolytically produced sodium hypochlorite solutions differ from other commercial solutions,

present different uses as both an antiseptic and disinfectant and alleviate some of the stereotypes associated with their medical use. Both in vitro controlled laboratory evaluations and clinical in vivo prospective randomized trials are introduced in this publication, making it a valuable help for clinicians working in the field of dialysis.

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.
