When three Vietnamese immigrants are found murdered and savagely mutilated in Calusa, Florida, police finger wealthy landowner Stephen Leeds as the prime suspect. The now-deceased trio had recently been acquitted of raping Leeds's wife, Jessie. From his jail cell, Leeds insists that, while they may have gotten what they deserved, he didn't dispense the vigilante justice. That's enough for attorney Matthew Hope to take on the case. But every piece of evidence ties his client to the grisly killings, from Leeds publicly vowing to avenge his wife's assault to the discovery of his wallet at the scene. And it doesn't help matters that Hope is going up against Assistant State Attorney Patricia Demming, who is dead-set on seeing Leeds fry for the crime. Acclaimed author and fan favorite Ed McBain blends powerful suspense with master storytelling for a thrilling and charged tale of two men--one whose life hangs in the balance and one who must follow a convoluted trail of secrets, seduction, and sabotage to get to the truth.

In 1962, South Korea assembled just 1,100 new automobiles. By 1996, this total had soared to 2,812,714. What explains this remarkable growth? The answer is complex, and involves a combination of a supportive State, timely technology alliances, a skilled but historically low-paid workforce, aggressive pricing, savvy entrepreneurs, and fortuitous circumstances. Despite this amazing ascent, comparatively little has been written about the Korean auto industry in English. In the first of a two-volume set, this 11-chapter book seeks to help fill this void by providing in-depth examinations of all six of Korea's automakers from their beginnings through 1996. Uniquely written from the perspective of industry analysts at the time (without knowledge of the Asian Fiscal Crisis), the book should prove informative to practitioners, scholars, and students interested in automotive history, international political economy, Asian studies, and more.

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident

bankers, shake vigorously, and you've got The Yugo: The Rise and Fall of the Worst Car in History. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.
