Action is the foundational key to all success. Pablo Picasso What does it take to succeed? How can I succeed? These are the questions that have been asked over the years. One method of learning more is to review the Success Manifesto of those who have attained success in their fields. As we know, a manifesto is a public declaration of intentions, motives or views. In this book, the CelebrityExperts(R) herein share their experiences in their various fields. Like most readers, these authors began their

missions at ground zero. As they progressed to success, they harnessed or developed many traits that they share. These traits typically include: a vision or chosen goal, perseverance, a knowledge of and passion for the subject, a willingness to take calculated risks, a plan, and the courage to take action. Regardless of the goals the authors have chosen, by using their ideas to mentor you, you can profit from their experiences, both positive and negative - thereby avoiding a loss of time and resources as you move closer to your own goal(s). So, are you ready? If you are, then go into action and start the process. Just think - one day you could write your own Success Manifesto

It had long since come to my attention that people of accomplishment rarely sat back and let things happen to them. They went out and happened to things.

“ One of the most acute books about

management and how companies work in practice that I have read in a long time. If anyone wants to know exactly how the U.S. auto industry got into trouble, here is your guide. ” —John Gapper, FINANCIAL TIMES When Bob Lutz got into the auto business in the early 1960s, CEOs knew that if you captured the public's imagination with innovative car design and top-quality craftsmanship, the money would follow. The “ car guys ” held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put its faith in numbers and spreadsheets. Determined to eliminate the “ waste ” and “ personality worship ” of the bygone creative leaders, management got too smart for its own good. With the bean counters firmly in charge, carmakers, and much of American industry, lost their single-minded focus on product excellence and their competitive advantage. Decline soon followed. In 2001, General Motors hired Lutz out of retirement with a mandate to save the company by making great cars again. As vice chairman, he launched a war against the penny-pinching number crunchers who ran the company by the bottom line and reinstated a focus on creativity, design, and cars and trucks that would satisfy GM's customers. Lutz's commonsense lessons, combined with a generous helping of fascinating anecdotes, will inspire readers in any industry.
