The Reader's Companion to World Literature Mcgraw-hill Dreamed up by drivers trying to outdo each other

on the mountain passes of Japan, the art of the sideways descent of a switchback-what Wired described as "the fishtailing

ballet of burning rubber called drifting"-has made it to the United States in a big way. What began as a new kind of daredevil driving among teens has, over two decades, become a sanctioned sport, making its way across the Pacific through video games and magazines, anime and the Internet, to take root in California's fertile underground racing culture. Drifting tells the story of drifting from its arrival on the West Coast to its emergence as the hottest form of

motorsport in the United States. A dramatic visual record of the sport in America that includes over 400 photos, the book also profiles the people, teams, techniques, web sites, publications, videos, and trends that have made drifting the phenomenon that it is today. For the curious newcomer, author Antonio Alvendia's introduction succinctly explains what drifting is, setting the stage for the thrilling automotive drama that then unfolds. For the veteran drifting fan, this

book is the first illustrated book on the latest motorsport to conquer the world.

Being a

gearhead matters.

Much as we love reading about the latest

hypercar or money-no-object custom

project, we believe vehicles

owned - and loved - by gearheads

like us are just as

meaningful, if not moreso. Our readers are self-made.

We buy vehicles for specific reasons and we learn how to maintain, modify, and repair them ourselves.

(With a little help from our friends, of course!)

Everyone you meet in an issue of

Gearbox Magazine is cool. If you spotted them in a parking lot, you

could walk right up to them and strike up a conversation

. And chances are you might end up lifelong friends.

We're not looking to get rich and forget our roots. We're trying to make a few bucks so we

can spend more time helping gearheads

build high performance machines & lives. This issue isn't

perfect, but neither are our daily drivers. We hope you'll grab a copy and tell a couple friends about us. Thanks for checking us out. GBXM-

Crawford's New Product Management 12e provides

the management approach to teaching new products, with the perspective of marketing. Adopters of previous editions will notice that the format is slimmed down to 18 chapters. This streamlined presentation focuses on the topics that will be of most importance and interest to new

product managers. Significant updates can be found throughout, and great pains have been taken to present the "best practices" of industry and relevancy to readers. Past adopters of New Products Management will notice major changes in this edition. While there are some changes in

virtually every chapter, some of the most substantial changes are as follows: 1. We have made major additions and updates to the cases to provide more plentiful and more current examples. We retired several cases from the previous edition, wrote many new cases, and thoroughly

updated many others. New cases for this edition include: Oculus Rift, Adidas Parley sustainable running shoes, Google Glass, Indiegogo, Tesla, Chipotle, Chick-fil-A, Corporate Social Responsibility at Starbucks, and many others. As always, we aim to offer a mix of high tech products and

consumer products and services in the set of cases. 2. In addition, we have substantially updated examples throughout the text wherever possible. We try to make use of illustrative examples that will resonate with today's students wherever possible. Of course, we welcome the reader's comments and

suggestions for improvement. 3. There continues to be much new research in new products, and we have tried to stay current on all of these topics. Readers will notice new or expanded coverage of portfolio management, value curve creation, the TRIZ method, crowd-sourcing, crowdfunding, observation al research, open innovation, organization al structure, 3D modeling, beta testing, sustainable product development, and frugal innovation, among other topics. 4. We continue the practice of referencing Web sites of interest throughout the text, and we have added the web addresses for several useful YouTube videos and other resources.
