In *Comeback*, Pulitzer Prize-winners Paul Ingrassia and Joseph B. White take us to the boardrooms, the executive offices, and the shop floors of the auto business to reconstruct, in riveting detail, how America's premier industry stumbled, fell, and picked itself up again. The story begins in 1982, when Honda started building cars in Marysville, Ohio, and the entire U.S. car industry seemed to be on the brink of extinction. It ends just over a decade later, with a remarkable turn of the tables, as Japan's car industry falters and America's Big Three emerge as formidable global competitors. *Comeback* is a story propelled by larger-than-life characters -- Lee Iacocca, Henry Ford II, Don Petersen, Roger

Smith, among many others -- and their greed, pride, and sheer refusal to face facts. But it is also a story full of dedicated, unlikely heroes who struggled to make the Big Three change before it was too late.

Dreameo up by drivers trying to outdo each other on the mountain passes of Japan, the art of the sideways descent of a switchback—what Wired described as "the fishtailing ballet of burning rubber called drifting"—has made it

to the United States in a big way. What began as a new kind of daredevil driving among teens has, over two decades, become a sanctioned sport, making its way across the Pacific through video games and magazines, anime and the Internet, to take root in California's fertile underground racing culture. Drifting tells the story of drifting from its arrival on the West Coast to its emergence as the hottest form of motorsport in the United States. A dramatic visual record of the sport in America that includes over 400 photos, the book also profiles the people, teams, techniques, web sites, publications, videos, and trends that have made drifting the phenomenon that it is today. For the curious newcomer, author Antonio Alvendia's introduction succinctly explains what drifting is, setting the stage for the thrilling automotive drama that then unfolds. For the veteran drifting fan, this book is the first illustrated book on the latest motorsport to conquer the world.

World Population Prospects Time Inc. Books "Messages, Signs, and Meanings" can be used directly in introductory courses in semiotics, communications, media, or culture studies. Additionally, it can be used as a complementary or supplementary text in courses dealing with cognate areas of investigation (psychology, mythology, education, literary studies, anthropology, linguistics). The text builds upon what readers already know intuitively about signs, and then leads them to think critically about the world in which they live - a world saturated with images

of all kinds that a basic knowledge of semiotics can help filter and deconstruct. The text also provides opportunities for readers to do "hands-on" semiotics through the exercises and questions for discussion that accompany each chapter. Biographical sketches of the major figures in the field are also included, as is a convenient glossary of technical terms." "The overall plan of the book is to illustrate how message-making and meaning-making can be studied from the specific vantage point of the discipline of semiotics. This third edition also includes updated discussions of information technology throughout, focusing especially on how meanings are now negotiated through such channels as websites, chat rooms, and instant messages."--Jacket.

Significant updates can be found throughout, and great pains have been taken to present the "best practices" of industry and relevancy to readers. Past adopters of New Products Management will notice major changes in this edition. While there are some changes in virtually every chapter, some of the most substantial changes are as follows: 1. We have made major additions and updates to the cases

New cases for this edition include: Oculus Rift, Adidas Parley sustainable running shoes, Google Glass, Indiegogo, Tesla, Chipotle, Chick-fil-A, Corporate Social Responsibility at Starbucks, and many others. Of course, we welcome the reader's comments and suggestions for improvement. 3. There continues to be much new research in new products, and

we have tried to stay current on all of these topics. Readers will notice new or expanded coverage of portfolio management, value curve creation, the TRIZ method, crowd-sourcing, crowdfunding, observational research, open innovation, organizational structure, 3D modeling, beta testing, sustainable product development, and frugal innovation, among other topics. 4.
