The evolution of the automotive transmission has changed rapidly in the last decade, partly due to the advantages of highly sophisticated electronic controls. This evolution has resulted in modern automatic transmissions that offer more control, stability, and convenience to the driver. Electronic Transmission Controls contains 68 technical papers from SAE and other international organizations written since 1995 on this rapidly growing area of automotive electronics. This book breaks down the topic into two sections. The section on Stepped Transmissions covers recent developments in regular and 4-wheel drive transmissions from major auto manufacturers, including Daimler Chrysler, General Motors, Toyota, Honda, and Ford. Technology covered in this section includes: smooth shift control automatic transmission efficiency mechatronic systems fuel saving technologies shift control using information from vehicle navigation systems fuzzy logic control. The section on Continuously Variable Transmissions presents papers that demonstrate that CVTs offer better efficiency than conventional transmissions. Technologies covered in this section include: powertrain control fuel consumption improvement development of a 2-way clutch system internal combustion engines with CVTs in passenger cars control and shift strategies CVT application to hybrid powertrains. The book concludes with a chapter on the future of electronic transmissions in automobiles.

Edward Thatcher's 1919 book, "Making Tin Can Toys," provides instructions on how to construct toy trucks, boats, trains, and windmills, as well as trays, candlesticks, and biscuit cutters, all out of used tin cans. Thatcher, an instructor of Decorative Metal Working at Columbia University's Teachers College in New York City, made clever and durable creations using simple tools and an abundant material. His design methods were trial-tested by both 10-12 year olds and wounded World War I soldiers. The book includes over 100 helpful diagrams and black-and-white photographs.

The new edition of Toward Speaking Excellence addresses the recent changes to the Test of Spoken English (TSE(R)). The text introduces readers to the format of the new TSE(R), typical questions, and scoring criteria. The second edition of Toward Speaking Excellence includes actual student responses that are used or modified to highlight specific characteristics of effective communication. Two complete sample TSE(R)-like tests are included for further practice. Also provided are practice with some of the skills that, while no longer tested on the

TSE(R), are key to sounding more native-like and fluent. Toward Speaking Excellence may be used as an individual study tool or as a course text. While the material is directed toward the TSE(R) and SPEAK(R) tests, the communication strategies presented will prepare students for other types of oral exams (including the TAST(R), interviews, and performance tests). Toward Speaking Excellence is a course book but may also be used for individual test-preparation/self-study. This guide replaces the 1984 publication entitled An Informational Guide for Roadway Lighting. It has been revised and brought up to date to reflect current practices in roadway lighting. The guide provides a general overview of lighting systems from the point of view of the transportation departments and recommends minimum levels of quality. The guide incorporates the illuminance and luminance design methods, but does not include the small target visibility (STV) method.

With a fresh approach to a common problem, this self-help guide to overcoming back pain advocates adopting the natural, healthy posture of athletes, young children, and people from traditional societies the world over. Arguing that most of what our culture has taught us about posture is misguided—even unhealthy—and exploring the current epidemic of back pain, many of the commonly cited reasons for the degeneration of spinal discs and the stress on muscles that leads to back pain are examined and debunked. The historical and anthropological roots of poor posture in Western cultures are studied as is the absence of back pain complaints in the cultures of Africa, Asia, South America, and rural Europe. Eight detailed chapters provide illustrated step-by-step instructions for making simple, powerful changes to seated, standing, and sleeping positions. No special equipment or exercise is required, and effects are often immediate.

IN LOVE WITH THE CAR takes a humorous look at the cult of the car. Mixing fact and fantasy with imaginative cartoons, it casts an irreverent eye over the mystique of car naming, the seduction of brand advertising and the history of some car manufacturers. Take a passenger seat, preferably in the back, and enjoy this motoring distraction without worrying about the road ahead.

The photos in this edition are black and white. Brake systems are one of the most important yet least understood vehicle systems. Brake systems can be intimidating, and they aren't the first thing the average horsepower junkie chooses to upgrade. But there's no reason to wait until you have a problem to learn how your brakes work. *High-Performance Brake Systems: Design, Selection, and Installation* gives you the knowledge to upgrade your brakes the right way the first time. Author James Walker, Jr. doesn't just tell you what to do--he uses over 315 photos and plain English to help you understand how and why your brake system works, what each of the components does, and how to intelligently upgrade your brakes for better performance. There are chapters showing you how to choose and install the most effective rotors, calipers, pads, and tires for your sports car, muscle car, race car, and street rod. You'll even find special sidebars detailing how each upgrade will affect your ABS system. Whether you are a commuter, a casual enthusiast, a weekend warrior, or a professional racer, this book is perfect for you.
