Kip's only friends are the members of the Daredevil Club, a club whose mission is to complete seven dangerous dares before their rivals, the Wildmen, complete their list of dares. Before the cliff diving accident in which he lost the use of his leg, Kip had been the leader of the Daredevil club. Now he has difficulty completing the dares and suspects that his membership is threatened. As the daredevils plan their final stunt, a dangerous climb along a narrow steel shelf beneath a bridge, they try to convince Kip that he may not be up to the task. Kip refuses to back down even though he suspects his friends might be right. Also available in French.

**The Praetorian STARShip : the untold story of the Combat Talon** Little, Brown  
Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller and Thigpen the crew force became the most disciplined in our Air Force. It was capable of

penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

**Homesteading** Pearson Higher Ed  
From New York Times bestselling author Sam Kean comes incredible stories of science, history, finance, mythology, the arts, medicine, and more, as told by the Periodic Table. Why did Gandhi hate iodine (I, 53)? How did radium (Ra, 88) nearly ruin Marie Curie's reputation? And why is gallium (Ga, 31) the go-to element for laboratory pranksters?\* The Periodic Table is a crowning scientific achievement, but it's also a treasure trove of adventure, betrayal, and obsession. These fascinating tales follow every element on the table as they play out their parts in human history, and in the lives of the (frequently) mad scientists who discovered them. THE DISAPPEARING SPOON masterfully fuses science with the classic lore of invention, investigation, and discovery--from the Big Bang through the end of time. \*Though solid at room temperature, gallium is a moldable metal that melts at 84 degrees Fahrenheit. A classic science prank is to mold gallium spoons, serve them with tea, and watch guests recoil as their utensils disappear.

**Popular Science** WALNECK'S CLASSIC CYCLE TRADER, AUGUST 2000  
Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

**Books in Print**  
This book aims to illustrate the impact of COVID-19 on the global aviation industry and its many facets and disruptive innovations this crisis is bringing to the industry, triggering a new phase of development for air transportation. As a result, there has been increased attention on the green aviation industry using new sustainable fuels (including hydrogen). The aviation industry is also moving towards operating electric aircraft. The book emphasizes a new concept of air travel and an entirely new type of aircraft called eVTOL, which is to say - electric Vertical take-off and landing aircraft. This new reality is already taking place with the development of prototypes. However, the road to its implementation is full of challenges.The later part of the book focuses on how China has opened doors to the private aviation sector as the country foresees an enormous opportunity to push its internal economy and aviation industry further.  
Popular Mechanics  
Experience one of the greatest adventure stories of the modern age in this New York Times bestseller: the harrowing tale of British explorer Ernest Shackleton's 1914 attempt to reach the South Pole. In August 1914, polar explorer Ernest Shackleton boarded the Endurance and set sail for Antarctica, where he planned to cross the last uncharted continent on foot. In January 1915, after battling its way through a thousand miles of pack ice and only a day's sail short of its destination, the Endurance became locked in an island of ice. Thus began the legendary ordeal of Shackleton and his crew of twenty-seven men. When their ship was finally crushed between two ice floes, they attempted a near-impossible journey over 850 miles of the South Atlantic's heaviest seas to the closest outpost of civilization. With an introduction by Nathaniel Philbrick, Endurance is the definitive account of Ernest Shackleton's fateful trip. Alfred Lansing brilliantly narrates the gripping and miraculous voyage that has defined heroism for the modern age.
