Reason and Argument DIANE Publishing

This text presents a clear and philosophically sound method for identifying, interpreting, and evaluating arguments as they appear in non-technical sources. It focuses on a more functional, real-world goal of argument analysis as a tool for figuring out what is reasonable to believe rather than as an instrument of persuasion. Methods are illustrated by applying them to arguments about different topics as they appear in a variety of contexts — e.g., newspaper editorials and columns, short essays, informal reports of scientific results, etc.

This book closes the gap for beginners who want to study the Amharic language and had difficulties in finding the right grammar for this purpose: The first grammar of Amharic, the national language of Ethiopia, was published by Hiob Ludolf in 1698. The Amharic grammar published by Praetorius in 1879 is based on Amharic religious texts and on scattered material, usually composed by missionaries. A milestone in the study of Amharic is Marcel Cohen's *Traite de langue amharique* (1936), but this grammar, too is not completely suited for beginners since the author's generalizations are at times aimed at linguists. The grammar that comes closest to the concept of a beginner's grammar is that of C.H. Dawkin (1960), yet this grammar is extremely short, does not give examples and does not introduce the student to the intricacies of the language. The new book gives all the grammatical forms and the sentences of the present grammar in Amharic script and in phonetic transcription. The illustrative examples have a free and a literal translation. This procedure should likewise prove to be useful for the Semitist as well as for the general linguist.

The last twenty years have seen a rise in the production, circulation, and criticism of new forms of socially engaged art aimed at achieving social justice and economic equality. In *Wages Against Artwork* Leigh Claire La Berge shows how socially engaged art responds to and critiques what she calls decommodified labor—the slow diminishment of wages

alongside an increase in the demands of work. Outlining the ways in which socially engaged artists relate to work, labor, and wages, La Berge examines how artists and organizers create institutions to address their own and others' financial precarity; why the increasing role of animals and children in contemporary art points to the turn away from paid labor; and how the expansion of MFA programs and student debt helps create the conditions for decommodified labor. In showing how socially engaged art operates within and against the need to be paid for work, La Berge offers a new theorization of the relationship between art and contemporary capitalism.

After Confucius is a collection of eight studies of Chinese philosophy from the time of Confucius to the formation of the empire in the second and third centuries B.C.E. As detailed in a masterful introduction, each essay serves as a concrete example of “thick description”—an approach invented by philosopher Gilbert Ryle—which aims to reveal the logic that informs an observable exchange among members of a community or society. To grasp the significance of such exchanges, it is necessary to investigate the networks of meaning on which they rely. Paul R. Goldin argues that the character of ancient Chinese philosophy can be appreciated only if we recognize the cultural codes underlying the circulation of ideas in that world. Thick description is the best preliminary method to determine how Chinese thinkers conceived of their own enterprise. Who were the ancient Chinese philosophers? What was their intended audience? What were they arguing about? How did they respond to earlier thinkers, and to each other? Why did those in power wish to hear from them, and what did they claim to offer in return for patronage? Goldin addresses these questions as he looks at several topics, including rhetorical conventions of Chinese philosophical literature; the value of recently excavated manuscripts for the interpretation of the more familiar, received literature; and the duty of translators to convey the world of concerns of the

original texts. Each of the cases investigated in this wide-ranging volume exemplifies the central conviction behind Goldin’s plea for thick description: We do not do justice to classical Chinese philosophy unless we engage squarely the complex and ancient culture that engendered it.

Which sort of seducer could you be? Siren? Rake? Cold Coquette? Star? Comedian? Charismatic? Or Saint? This book will show you which. Charm, persuasion, the ability to create illusions: these are some of the many dazzling gifts of the Seducer, the compelling figure who is able to manipulate, mislead and give pleasure all at once. When raised to the level of art, seduction, an indirect and subtle form of power, has toppled empires, won elections and enslaved great minds. In this beautiful, sensually designed book, Greene unearths the two sides of seduction: the characters and the process. Discover who you, or your pursuer, most resembles. Learn, too, the pitfalls of the anti-Seducer. Immerse yourself in the twenty-four manoeuvres and strategies of the seductive process, the ritual by which a seducer gains mastery over their target. Understand how to 'Choose the Right Victim', 'Appear to Be an Object of Desire' and 'Confuse Desire and Reality'. In addition, Greene provides instruction on how to identify victims by type. Each fascinating character and each cunning tactic demonstrates a fundamental truth about who we are, and the targets we've become - or hope to win over. The Art of Seduction is an indispensable primer on the essence of one of history's greatest weapons and the ultimate power trip. From the internationally bestselling author of The 48 Laws of Power, Mastery, and The 33 Strategies Of War.

The second generation of Aspers that now runs Canada's largest news media company is much like the first. Israel "Izzy" Asper's three children often appear in today's headlines. David is bidding to buy the Winnipeg Blue Bombers football team. Gail heads fundraising efforts for the new Canadian Museum of Human Rights. Leonard sits in his father's place as head of CanWest Global Communications. Like its founder, they also use their media empire to influence public opinion. Asper Nation explains why Canadians should be concerned about where the country's first family of news media is coming from, politically. Izzy Asper was an oddity as a Liberal politician in the 1970s. Fiscally, he was to the right of most Conservatives. As a nationally syndicated newspaper columnist, he called for a flat tax and "workfare." As a best-selling author, he helped thwart a plan to shift Canada's tax burden from the middle class onto corporations. But when Asper took his policies to Manitobans as Liberal leader in 1973, he was soundly defeated. Asper got into the television business instead and built Canada's third network. Asper made CanWest the country's most profitable broadcaster by feasting on regulations that encouraged the importation of cheap American programming. He took his formula to the world in the 1990s, buying television networks in New Zealand, Australia, and Ireland. Then in 2000, Asper pioneered media "convergence," buying Canada's largest newspaper chain from Conrad Black. Southam dailies were soon ordered to run "national" editorials written at CanWest Global headquarters in Winnipeg. This corporate news control brought protest from journalists and two

government inquiries. Neither resulted in long-sought limits on media ownership, however. Marc Edge offers a compelling account of the political perils involved in allowing the Asper family to dominate Canadian media.

Online Communication provides an introduction to both the technologies of the Internet Age and their social implications. This innovative and timely textbook brings together current work in communication, political science, philosophy, popular culture, history, economics, and the humanities to present an examination of the theoretical and critical issues in the study of computer-mediated communication. Continuing the model of the best-selling first edition, authors Andrew F. Wood and Matthew J. Smith introduce computer-mediated communication (CMC) as a subject of academic research as well as a lens through which to examine contemporary trends in society. This second edition of Online Communication covers online identity, mediated relationships, virtual communities, electronic commerce, the digital divide, spaces of resistance, and other topics related to CMC. The text also examines how the Internet has affected contemporary culture and presents the critiques being made to those changes. Special features of the text include:

*Hyperlinks--presenting greater detail on topics

from the chapter *Ethical Ethical Inquiry--posing questions on the nature of human communication and conduct online *Online Communication and the Law--examining the legal ramifications of CMC issues Advanced undergraduates, graduate students, and researchers interested in the field of computer-mediated communication, as well as those studying issues of technology and culture, will find Online Communication to be an insightful resource for studying the role of technology and mediated communication in today's society.
