Few titles could be timelier than the second edition of *Crisis Management in the Food and Drinks Industry – A Practical Approach*. The world is worrying about a human pandemic arising from the avian flu epidemic that is spreading from the Far East, the implications of which could be as great for the food industry as were the outbreaks of foot and mouth disease and BSE. This practical and greatly expanded edition by media and public relations veteran Colin Doeg focuses on the communications aspects of dealing with a crisis. It is global in its coverage of the subject, reviewing practices

and requirements in countries ranging from the USA and the UK to Australia and New Zealand. Doeg offers advice ranging from preparing for the unthinkable to the dramatic expansion of the Internet, avoiding being caught off-guard by a situation, the ramifications of product tampering and managing an actual crisis. Advice is also offered on dealing with extremist organizations and terrorist threats as well as bioterrorism – "a clear and present danger" – and a number of problems facing the food industry, including the practice of selling meat unfit for human consumption and the threat posed by the increasing toxicity of fish due to the rising pollution of the world ' s oceans. In a special late chapter – written only three months before publication – the author looks ahead to events which he believes will shape the world of crisis management in the future, including the empowering influence of the Internet during the 2004 Asian Tsunami, the discovery of the illegal dye Sudan 1 (Red) in millions of food products and the fears of a pandemic arising from the spreading outbreak of avian flu. Examples of typical documents like a crisis plan for a business, a crisis checklist, a press release announcing a product recall, an announcement to employees and a checklist for anyone dealing with a threatening phone call are provided. Also included is a list of sources of information and assistance in the event of a product crisis. *Crisis Management in the Food and Drinks Industry* is the only title dealing specifically with this crucial subject in relation to the food industry. As such, it is relevant not only to those in the food industry, but also to marketing and senior management in general in the fields of agriculture, public health and law enforcement.

Educational Research and Innovation The Nature of Learning Using Research to Inspire Practice Springer

"A major contribution to the study of global events in times of global media. Owning the Olympics tests the possibilities and limits of the concept of 'media events' by analyzing the mega-event of the information age: the Beijing Olympics. . . . A good read from cover to cover." —Guobin Yang, Associate Professor, Asian/Middle Eastern Cultures & Sociology, Barnard College, Columbia University From the moment they were announced, the Beijing Games were a major media event and the focus of intense scrutiny and speculation. In contrast to earlier such events, however, the Beijing Games are also unfolding in a newly volatile global media environment that is no longer monopolized by broadcast media. The dramatic expansion of media outlets and the growth of mobile communications technology have changed the nature of media events, making it significantly more difficult to regulate them or control their meaning. This volatility is reflected in the multiple, well-publicized controversies characterizing the run-up to Beijing 2008. According to many Western commentators, the People's Republic of China seized the Olympics as an opportunity to reinvent itself as the "New China"---a global leader in economics, technology, and environmental issues, with an improving human-rights record. But China's maneuverings have also been hotly contested by diverse global voices, including prominent human-rights advocates, all seeking to displace the official story of the Games. Bringing together a distinguished group of scholars from Chinese studies, human rights, media studies, law, and other fields, Owning the Olympics reveals how multiple entities---including the Chinese Communist Party itself---seek to influence and control the narratives through which the Beijing Games will be understood. digitalculturebooks is an imprint of the University of Michigan Press and the Scholarly Publishing Office of the University of Michigan Library dedicated to publishing innovative and accessible work exploring new media and their impact on society, culture, and scholarly communication.
