Paul B. has over 40 years of experience as a radio/TV writer, broadcaster, and talk show host. He began his career as reporter for the Boston Globe. Twelve years later he wrote a book about the Cocoanut Grove Fire of 1942, in which 590 persons were killed. After the success of this book he accepted a position on a CBS owned radio station in Boston. Next came a television opportunity in Chicago. He then returned to Boston and began his own morning TV talk show. For the next 32 years his hectic schedule created a steam-kettle atmosphere fueled by alcohol, continuing for the next 32 years. In 1983, Paul B. came to Alcoholics Anonymous. While in this program he collected the remarkable quotations that comprise this book. **ON SOBER REFLECTION** is an excellent compilation of statements from people struggling with the burden of alcoholism. Written by someone who has remained alcohol free for an amazing 45 years, this book is a valuable tool for anyone struggling with alcoholism or for any loved one struggling with this problem.

When considering how well modern cars perform in many areas, it is easy to forget some of the issues motorists had on a regular basis 40+ years ago. Cars needed maintenance regularly: plugs and points had to be replaced on a frequent basis, the expected engine life was 100,000 miles rather than double and triple the

expectation that you see today, and an everyday hassle, especially in warm climates, was being the victim of an overheating car. It was not uncommon on a hot day to see cars stuck in traffic, spewing coolant onto the ground with the hoods up in a desperate attempt to cool off. Fast-forward to today, and it's easy to forget that modern cars even have coolant. The temp needle moves to where it is supposed to be and never moves again until you shut the car off. For drivers of vintage cars, this level of reliability is also attainable. In *High-Performance Automotive Cooling Systems*, author Dr. John Kershaw explains the basics of a cooling system operation, provides an examination of coolant and radiator options, explains how to manage coolant speed through your engine and why it is important, examines how to manage airflow through your radiator, takes a thorough look at cooling fans, and finally uses all this information in the testing and installation of all these components. Muscle cars and hot rod engines today are pushed to the limit with stroker kits and power adders straining the capabilities of your cooling system to extremes never seen before. Whether you are a fan of modern performance cars or a fan of more modern performance in vintage cars, this book will help you build a robust cooling system to match today's horsepower demands and help you keep your cool.

This practical manual been written for the car-owner who is already a competent driver under normal road conditions but who would like to be a better-than-average driver, and especially for the man who wishes to try his hand at competition work—both racing and rallying. Paul Fr è re—Grand Prix driver and engineer, Le Mans winner and author—gives invaluable instruction based on his many years of experience on the racing circuits of Europe and America. He deals briefly with theoretical matters and then proceeds with his driving lessons:

making the most of practice; learning a circuit; racing starts; cut-off and braking points; slides and drifts; taking advantage of road camber; passing and being passed; slipstreaming; driving under wet and icy conditions and racing at night. He also gives practical advice on race tactics, flag marshals, time keeping, pit signals, race wear, seat belts, the choice of gear ratios and tyres and the different problems posed by road and track racing. With the aid of 60 photographs and diagrams M. Fr è re explains the correct line to take on various types of corners and why, the effects of peculiarities of surface, and analyses the forces acting on a car in cornering. The book is “ required reading ” for every ambitious driver in Club and Formula Junior racing and for Rallymen.

For over 25 years Rob Siegel has written a monthly column called "The Hack Mechanic" for the BMW Car Club of America's magazine Roundel. In *Memoirs of a Hack Mechanic*, Rob Siegel shares his secrets to buying, fixing, and driving cool cars without risking the kids' tuition money or destroying his marriage. And that's something to brag about considering the dozens of cars, including twenty-five BMW 2002s, that have passed through his garage over the past three decades. With a steady dose of irreverent humor, *Memoirs of a Hack Mechanic* blends car stories, DIY advice, and cautionary tales in a way that will resonate with the car-obsessed (and the people who love them).
