Written by a practicing emergency physician, *The White Coat Investor* is a high-yield manual that specifically deals with the financial issues facing medical students, residents, physicians, dentists, and similar high-income professionals. Doctors are highly-educated and extensively trained at making difficult diagnoses and performing life saving procedures. However, they receive little to no training in business, personal finance, investing, insurance, taxes, estate planning, and asset protection. This book fills in the gaps and will teach you to use your high income to escape from your student loans, provide for your family, build wealth, and stop getting ripped off by unscrupulous financial professionals. Straight talk and clear explanations allow the book to be easily digested by a novice to the subject matter yet the book also contains advanced concepts specific to physicians you won't find in other financial books. This book will teach you how to: Graduate from medical school with as little debt as possible Escape from student loans within two to five years of residency graduation Purchase the right types and amounts of insurance Decide when to buy a house and how much to spend on it Learn to invest in a sensible, low-cost and effective manner with or without the assistance of an advisor Avoid investments which are designed to be sold, not bought Select advisors who give great service and advice at a fair price Become a millionaire within five to ten years of residency graduation Use a "Backdoor Roth IRA" and "Stealth IRA" to boost your retirement funds and decrease your taxes Protect your hard-won assets from professional and personal lawsuits Avoid estate taxes, avoid probate, and ensure your children and your money go where you want when you die Minimize your tax burden, keeping more of your hard-earned money Decide between an employee job and an independent contractor job Choose between sole proprietorship, Limited Liability Company, S Corporation, and C Corporation Take a look at the first pages of the book by clicking on the Look Inside feature Praise For *The White Coat Investor* "Much of my financial planning practice is helping doctors to correct mistakes that reading this book would have avoided in the first place." - Allan S. Few people are familiar with the full history that shaped and preserved the fish and wildlife of coastal South Carolina. From Native Americans to the early colonists to plantation owners and their slaves to market hunters and commercial fishermen, all viewed fish and wildlife as limitless. Through time, however, overharvesting led to population declines, and the public demanded conservation. The process that produced fish and game laws, wardens and wildlife refuges was complex and often involved conflict, but synergy and cooperation ultimately produced one of the most extensive conservation systems on the East Coast. Author James O. Luken presents this fascinating story.

In the early 1970s, Chrysler started working on a "magic wagon" -- a completely new passenger van that would fit into a normal garage. It was a daring project for a company that was strapped for cash. This book taps the people who created the minivans, with previously unpublished photos of the original clay models.

---

It is not just a story of a vehicle, but of the people who pushed it through the development process, brought it to life, and refreshed it in the face of intense competition. Engineers, planners, and designers started arguing over alternatives ten years before the first van left the factory. This book dives into the reasons behind their decisions, and some of the ways minivans could have been very different; it also covers electric and CNG minivans, engines and transmissions, concept cars, and the assembly plants. The paperback is generously illustrated with full-color design studies and photos of the final product; the Kindle version has fewer photos, but still covers the original clay models and the concepts. "It's incredibly rare when the auto industry creates an entirely new class of vehicle, and rarer still when that innovation is an unqualified success story, but such was the case with Chrysler and the development of the minivan. "In Mopar Minivans, Zatz uses the people who were there to retell in vivid detail the largely forgotten story of how this innovative people mover evolved into a quintessential piece of American family life for two generations. It's a story that showcases not only how the automotive industry can work at its best, but also the ways that the industry's prevalent groupthink mentality can stifle innovation." -- Larry Vellequette, Automotive News "I am amazed how complete you are, having not been on-site in the front trenches during agreements, disagreements, and, yes, even skirmishes, at times." -- Chrysler employee David Zatz founded Chrysler-focused web site allpar.com; he also holds a Ph.D. in social and organizational psychology from Columbia University, and has been a business consultant for 20 years.
