Magisterial in vision, sweeping in scope, this monumental work presents a seamless account of Japanese society during

the modern era, from 1600 to the present. A distillation of more than fifty years ' engagement with Japan and its history, it is the crowning work of our leading interpreter of the modern Japanese experience. Since 1600 Japan has undergone three periods of wrenching social and institutional change, following the imposition of hegemonic order on feudal society by the Tokugawa shogun; the opening of Japan ' s ports by Commodore Perry; and defeat in World War II. The Making of Modern Japan charts these changes: the social engineering begun with the founding of the shogunate in 1600, the emergence of village and castle towns with consumer populations, and the diffusion of samurai values in the culture. Marius Jansen covers the making of the modern state, the adaptation of Western models, growing international trade, the broadening opportunity in Japanese society with industrialization, and the postwar occupation reforms imposed by General MacArthur. Throughout, the book gives voice to the individuals and views that have shaped the actions and beliefs of the Japanese, with writers, artists, and thinkers, as well as political leaders given their due. The story this book tells, though marked by profound changes, is also one of remarkable consistency, in which continuities outweigh upheavals in the development of society, and successive waves of outside influence have only served to strengthen a sense of what is unique and native to Japanese experience. The Making of Modern Japan takes us to the core of this experience as it illuminates one of the contemporary world ' s most compelling transformations.

Recently vilified as the prime dynamic driving home the breach between poor and rich nations, here the branding process is rehabilitated as a potential saviour of the economically underprivileged. Brand New Justice, now in a revised paperback edition, systematically analyses the success stories of the Top Thirteen nations, demonstrating that their wealth is based on the

'last mile' of the commercial process: buying raw materials and manufacturing cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of

---

capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he demonstrates the very real possibility of

enlightened capitalism working as a force for good in global terms. Cycle World Magazine Routledge
