A story of magic, family, a mysterious stranger . . . and a band of marauding raccoons. Otter Lake is a sleepy Anishnawbe community where little happens. Until the day a handsome stranger pulls up astride a 1953 Indian Chief motorcycle – and turns Otter Lake completely upside down. Maggie, the Reserve's chief, is swept off her feet, but Virgil, her teenage son, is less than enchanted. Suspicious of the stranger's intentions, he teams up with his uncle Wayne – a master of aboriginal martial arts – to drive the stranger from the Reserve. And it turns out that the raccoons are willing to lend a hand.

In this book, Dr. Andras Sobester reviews the science behind high altitude flight. He takes the reader on a journey that begins with the complex physiological questions involved in taking humans into the "death zone." How does the body react to falling ambient pressure? Why is hypoxia (oxygen deficiency associated with low air pressure) so dangerous and why is it so difficult to 'design out' of aircraft, why does it still cause fatalities in the 21st century? What cabin pressures are air passengers and military pilots exposed to and why is the choice of an appropriate range of values such a difficult problem? How do high altitude life support systems work and what happens if they fail? What happens if cabin pressure is lost suddenly or, even worse, slowly and unnoticed? The second part of the book tackles the aeronautical problems of flying in the upper atmosphere. What loads does stratospheric flight place on pressurized cabins at high altitude and why are these difficult to predict? What determines the maximum altitude an aircraft can climb to? What is the 'coffin corner' and how can it be avoided? The history of aviation has seen a handful of airplanes reach altitudes in excess of 70,000 feet – what are the extreme engineering challenges of climbing into the upper stratosphere? Flying high makes very high speeds possible -- what are the practical limits? The key advantage of stratospheric flight is that the aircraft will be 'above the weather' – but is this always the case? Part three of the book investigates the extreme atmospheric conditions that may be encountered in the upper atmosphere. How high can a storm cell reach and what is it like to fly into one? How frequent is high altitude 'clear air' turbulence, what causes it and what are its effects on aircraft? The stratosphere can be extremely cold – how cold does it have to be before flight becomes unsafe? What happens when an aircraft encounters volcanic ash at high altitude? Very high winds can be encountered at the lower boundary of the stratosphere – what effect do they have on aviation? Finally, part four looks at the extreme limits of stratospheric flight. How high will a winged aircraft will ever be able to fly? What are the ultimate altitude limits of ballooning? What is the greatest altitude that you could still bail out from? And finally, what are the challenges of exploring the stratospheres of other planets and moons? The author discusses these and many other questions, the known knowns, the known unknowns and the potential unknown unknowns of stratospheric flight through a series of notable moments of the recent history of mankind's forays into the upper atmospheres, each of these incidents, accidents or great triumphs illustrating a key aspect of what makes stratospheric flight aviation at the limit.

The Making of Modern Japan Springer Science & Business Media

Magisterial in vision, sweeping in scope, this monumental work presents a seamless account of Japanese society during the modern era, from 1600 to the present. A distillation of more than fifty years ' engagement with Japan and its history, it is the crowning work of our leading interpreter of the modern Japanese experience. Since 1600 Japan has undergone three periods of wrenching social and institutional change, following the imposition of hegemonic order on feudal society by the Tokugawa shogun; the opening of Japan ' s ports by Commodore Perry; and defeat in World War II. The Making of Modern Japan charts these changes: the social engineering begun with the founding of the shogunate in 1600, the emergence of village and castle towns with consumer populations, and the diffusion of samurai values in the culture. Marius Jansen covers the making of the modern state, the adaptation of Western models, growing international trade, the broadening opportunity in Japanese society with industrialization, and the postwar occupation reforms imposed by General MacArthur. Throughout, the book gives voice to the individuals and views that have shaped the actions and beliefs of the Japanese, with writers, artists, and thinkers, as well as political leaders given their due. The story this book tells, though marked by profound changes, is also one of remarkable consistency, in which continuities outweigh upheavals in the development of society, and successive waves of outside influence have only served to strengthen a sense of what is unique and native to Japanese experience. The Making of Modern Japan takes us to the core of this experience as it illuminates one of the contemporary world ' s most compelling transformations.

When the resurgent Sinaloa cartel attacks Wolf and his wife, Elle Parker, on the Crow Indian reservation, the safety of his people becomes Job One-until the president of the United States orders Shadow Tier to stop the Taliban's opium trade. The president's message: The drug war is a failure. Fix this now. Torn between saving his people and the president's demands for direct action, Wolf sends Shadow Tier's Bravo Squadron to Afghanistan to infiltrate the Taliban drug organization. He sends Kieran Kennedy, his executive officer, to stand up and train a new international Charlie Squadron in the U.K. While Wolf bends the rules to protect the reservation on the home front, the squadrons track opium with a mysterious United Nations connection out of Afghanistan to a new "French Connection" in Marseilles, France. The teams identify a likely distribution hub and its leadership. But going deeper will take initiative and innovation. Kennedy takes the dangerous decision to operate in the open ... as a fake drug cartel. The operation yields results, but there is a piece missing. Parker and Kennedy believe a government contractor providing logistics flights into and out of the war zones is involved. Plans are made by the fake cartel for a large shipment of heroin to go to the mafia in New York City, where wholesale arrests will be made if all goes as planned. As the data pours in from three continents, the heroin network unfolds and things to do not go as planned. The takedown of a multi-national drug production, shipment, and sales operation is unlike any operation Shadow Tier has attempted. For the president, this is a no-fail mission. For Shadow Tier, it's time to bring war back to the war on drugs.

Recently vilified as the prime dynamic driving home the breach between poor and rich nations, here the branding process is rehabilitated as a potential saviour of the economically underprivileged. Brand New Justice, now in a revised paperback edition, systematically analyses the success stories of the Top Thirteen nations, demonstrating that their wealth is based on the 'last mile' of the commercial process: buying raw materials and manufacturing cheaply in third world countries, these countries realise their lucrative profits by adding value through finishing, packaging and marketing and then selling the branded product on to the end-user at a hugely inflated price. The use of sophisticated global media techniques alongside a range of creative marketing activities are the lynchpins of this process. Applying his observations on economic history and the development and impact of global marketing, Anholt presents a cogent plan for developing nations to benefit from globalization. So long the helpless victim of capitalist trading systems, he shows that they can cross the divide and graduate from supplier nation to producer nation. Branding native produce on a global scale, making a commercial virtue out of perceived authenticity and otherness and fully capitalising on the 'last mile' benefits are key to this graduation and fundamental to forging a new global economic balance. Anholt argues with a forceful logic, but also backs his hypothesis with enticing glimpses of this process actually beginning to take place. Examining activities in India, Thailand, Russia and Africa among others, he shows the risks, challenges and pressures inherent in 'turning the tide', but above all he demonstrates the very real possibility of enlightened capitalism working as a

The clock is relentlessly ticking Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years,

in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, *The 2030 Spike* serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

A two-man undercover team working for U.S. Customs to disrupt drug smuggling across the Mexican border is missing. The school teacher brother of one missing team member finds their safe house and learns about their mission and the high tech electronics and weapons they use. Since he knows nothing about how spooks operate, the teacher hires a Native American Viet Nam veteran to help him track down the men. Together, the two amateurs slip into drug cartel territory and begin their search for the covert team, or their bodies. Before long, the amateurs discover the missing team is in jail. However, they don't know they were betrayed by a U.S. Customs official who is dirty with drug money payoff. Recruiting some locals, the amateurs formulate a plan to break the team out of jail, not realizing their movements are being monitored by the highest U.S. espionage bureau, the NSA.
