2004 Cars

Since the late 1980s, green consumerism has been hailed in the West as an efficient solution to environmental problems. However, Chinese consumers have been slow to warm up to eco-friendly

products. Consumers prefer SUVs to hybrid cars, health supplements and snake oil medicines to organic foods and eco-fashion is still secluded in high-end designer studios. These choices contradict the findings of many sustainable lifestyle surveys that claim to register a rising desire for green products among the Chinese. This book examines the psycho-cultural differences that disrupt the translation of "eco-friendly" appeals to China by analyzing environmental advertising. It explores the different notions of "green", the structures of desire that underlies the advertisements, and how they are shaped by

ideological, cultural, and historical differences. Rather than arguing the superiority of the American or Chinese version of green consumerism, the book interrogates the role of advertising in the global spread of Western ideologies and explores the possibilities for consumers to resist transnational corporate hegemony in the green movement. This book fills an important gap in the critical scholarship on green marketing and should be of interest to students and scholars of environment studies, green advertising and marketing, environmental communication and media

studies, China studies and environmental sociology, ethics and cultural studies.

Consumer Reports Buying Guide

EBONY is the flagship magazine of Johnson

Publishing. Founded in 1945 by John H. Johnson, it still maintains the highest global circulation of any African American-focused magazine.

The Virginia Engineer
Build and modify your 1973-1987 GMC or Chevrolet truck in your garage with step-by-step processes to boost power, add curb appeal, and improve stopping ability, handling, safety, and more. GM's square-body trucks are a solid, simple, and easy-to-find rig--and that makes them perfect for modification. They're American classics, and they've become the hot

rods of a new generation. Veteran magazine editor Jim Pickering brings these trucks into focus, taking you through the aspects that make them so popular and modifications you can perform to put a modern spin on their classic looks. He takes an in-depth look at all the major systems in your C10 and covers what can be done to them to turn your classic hauler into the modern hot rod that you want: a truck that's fast, safe, full of curb appeal, and reliable enough to drive whenever and wherever you want. Built in massive numbers during an 18-year production run, these trucks aren't hard to source, but finding a good

starting point and mapping out your plan are important. This book covers a lot of territory: how to find a good starter truck, LS power builds and installs, slammed air suspension and coilover systems, automatic and manual transmission choices (including a 6-speed manual conversion), cooling system upgrades, safely adding a modern alternator to factory GM wiring, modifying a mechanical clutch pedal to use a hydraulic master and slave cylinder, making new fuel lines and brake lines to support fuel injection and big brakes, installing a 4-link rear suspension system, fabricating

an under-bed mount to hide air suspension components, building exhaust, adding LED lighting, interior restoration, and more. If you're building a square-body truck that you'd actually like to drive regularly, you've come to the right place. There hasn't ever been a more comprehensive, authoritative look at building a complete truck for street use that includes all the steps required to make it work. [Automotive Industries](#) This all-new edition of the latest guide to passenger cars, minivans, and sport-utility vehicles features photos of the newest

models, the latest suggested retail and dealer invoice prices factory options, EPA mileage estimates, warranty information, and more. Original.

Automotive Engineering International

The all-new Hummer H3

will reach market in early 2005, just as this book chronicling its development is published. The H3 will offer traditional Hummer off-road durability and stump-pulling power in a smaller, more-affordable SUV-styled package. Interest in the new model is very high and the automotive website "edmunds.com" reported, ". . . the smaller and cheaper H3 is likely to become the most popular Hummer ever."
