Elsevier**

Rover's big hatchback saloon of the 1970s and 1980s had all the elements of a superb motor car. It was the work of long-standing Rover engineers, with

substantial input from their colleagues at Triumph. The SD1's top models even shared their V8 engines with earlier and much-loved classics from Rover. It was stunningly attractive, cleverly derived from Italian supercar styling and still extraordinarily practical thanks to its large hatchback configuration. In this new book, Rover historian James Taylor tells the full story of the SD1, warts and

---

all, from initial concept to final production model. The oft-criticized early models and the more successful later variants are discussed as well as the exclusive Vitesse and Vanden Plas models and overseas and police variants. Finally, for those inspired enough to seek one out today, there is guidance on purchase and ownership. Includes full production histories and comprehensive specification details and is fully illustrated with 200 colour and 70 black & white photographs.

Land Rover Defender, 90 and 110 Range - 30 Years of the Coil-Sprung 4x4 Models charts the evolution of the coil-sprung Defender vehicles. When Land Rover switched from leaf springs to coil springs for their utility models in 1983, it was a major step forward. The first coil-sprung model, the One Ten, replaced the Series III 109s. The short-wheelbase Ninety replaced the Series III 88s in 1984. From 1990, the models were all re-branded as Land Rover Defenders - 90, 110 and 140 - as the Land Rover range expanded and the marketing teams wanted a new name. Topics covered include: Origins of the Defender and early Ninety

and One Ten Models; Development and use of the long-wheelbase models; Special conversions and Defenders built outside the UK, including in Australia and South Africa; Military and emergency service use of the Defender; Detailed examinations of engines and engineering, and the focus on diesel power; The future of the Defender. Charts the evolution of the coil-sprung Defender vehicles - the early 90 and 110 models from 1983 to present day. A must buy for all Land Rover enthusiasts. Superbly illustrated with 300 colour photographs. James Taylor is a well-known writer on classic motoring and a specialist on the Land Rover marque.

The Kenya Gazette is an official publication of the government of the Republic of Kenya. It contains notices of new legislation, notices required to be published by law or policy as well as other announcements that are published for general public information. It is published every week, usually on Friday, with occasional releases of special or supplementary editions within the week.

*The Autocar* The Crowood Press Addressing the growing global concern for sustainable engineering, Materials and the Environment, 2e is the only book devoted exclusively to the environmental aspects of materials. It explains the ways in

---

which we depend on and use materials and the consequences these have, and it introduces methods for thinking about and designing with materials within the context of minimizing environmental impact. Along with its noted in-depth coverage of material consumption, the material life-cycle, selection strategies, and legislative aspects, the second edition includes new case studies, important new chapters on Materials for Low Carbon Power and Material Efficiency, all illustrated by in-text examples and expanded exercises. This book is intended for instructors and students as well as materials engineers and product designers who need to consider the environmental implications of materials in their designs. Introduces methods and tools for thinking about and designing with materials within the context of their role in products and the environmental consequences Contains numerous case studies showing how the methods discussed in the book can be applied to real-world situations Includes full-color data

sheets for 40 of the most widely used materials, featuring such environmentally relevant information as their annual production and reserves, embodied energy and process energies, carbon footprints, and recycling data New to this edition: New chapter of Case Studies of Eco-audits illustrating the rapid audit method New chapter on Materials for Low Carbon Power examines the consequences for materials supply of a major shift from fossil-fuel based power to power from renewables New chapter exploring Material Efficiency, or design and management for manufacture to provide the services we need with the least production of materials Recent news-clips from the world press that help place materials issues into a broader context. are incorporated into all chapters End-of-chapter exercises have been greatly expanded The datasheets of Chapter 15 have been updated and expanded to include natural and man-made fibers

The Rover P6 was unquestionably one of the best saloon cars to come out of Britain in the 1960s and was winner of the first-ever European Car of the Year award. It combined a wealth of technical innovation with a distinctive appearance that incorporated exactly the right degree of Italianate sharp-suited appearance for its time. It was, and remains, a great car to drive, and all these qualities were combined with the space and practicality of a four-seat family saloon. Rover P6: 2000, 2200, 3500 - The Complete Story documents its evolution from the earliest ideas in the 1950s to the end of production in 1977. It describes all the models with specification tables and paint and trim options, including NADA and Federal cars and remembers the motorsport successes and failures. It records the manufacturing

process at Solihull and CKD overseas and includes a useful chapter on buying and owning a Rover P6.

Bodyguard: Ambush (Book 5)  
Woodhead Publishing

Fully comprehensive with many illustrations - owners' workshop manual for the 90,110 Defender petrol and diesel engines from 1983-on.

Teenage bodyguard Connor must survive the wilds of the African savanna in a life-or-death mission--perfect for fans of Alex Rider, Tom Clancy's The Division, and James Bond! With two successful missions under his belt, Connor Reeves is quickly

rising up the ranks of the covert teen bodyguard organization known as Guardian. So he's the natural choice when a French diplomat seeks Guardian's services to protect his family on a safari in Africa. With no obvious threats at hand, it sounds like the vacation of a lifetime. But deep in the savanna, the safari turns to chaos when their convoy is ambushed by brutal gunmen seeking bloodshed and riches. Fleeing through the bush, Connor and those under his protection become the prey in a deadly hunt across the African plains. Combining pulse-pounding action, diabolical enemies, and an insider's knowledge of the tricks of the trade, the Bodyguard series is the perfect target for fans of Alex Rider, James Bond, Jack Bauer, and Jason Bourne. Praise for the Bodyguard series: "Breathtaking action . . . as real as it gets."—Eoin Colfer, author of the

*The Land Rover Story* The Crowood Press

Rover V8 – the Story of the Engine tells the fascinating story of the engine that created a legend in its own lifetime. Starting life as a General Motors design in 1961, but withdrawn three years later in favour of cheaper technology, it reached Rover by chance in the mid-1960s. Few other British companies then had V8 engines in production, and Rover immediately gained a special status when the V8 entered UK production during 1967. This was an extraordinarily compact design and also extraordinarily light, thanks to its all-

aluminium alloy construction. It was not a temperamental high-performance engine, but had a well-proven and simple architecture that made it both reliable and easy to work on. Small wonder, then, that the Rover V8 was bought by sports car makers who needed a light, compact and powerful engine. Small wonder that Rover kept it in production for so long, developing multiple different sizes and versions. Small wonder that the engine is still revered by Rover and Land Rover enthusiasts today, or that its popularity as an aftermarket conversion has ensured that it remains in small-volume production, half a century after entering production in the UK.
