'Ello, there. It will come as no surprise that yours truly is a big fan of cars. Over the years I've got together facts and figures on all the greatest motors and stuck them in this 'ere scrapbook - one car for every year

since they made FAB1, the greatest car of all time. Course I would say that, bein' its driver an' all, but it's not every car that can shoot criminals and swim 'appily along in the Mediterranean. They made FAB1 in 1965, and since then there 'ave been some real beauties, like the Lamborghini Countach, Ford Thunderbird Turbo Coupe and Bugatti Veyron Super Sport. You gotta love 'em - specially when I tell you all the history and technical stuff what's gone into 'em.

The Midlife Manual John Wiley & Sons

These days, there are many advantages to buying a

used car over a new car. Unfortunately,

purchasing a used car may pose a greater risk to

the consumer. A used car in its nature will most

likely need more repairs, lack newer safety

measures, and may come with a short warranty or

none at all. That is why it is so important for

consumers to do extensive research so they can

avoid all of the pitfalls of the used car market

category. The auto experts at "Consumer Reports"

have done the work for you and have compiled

their extensive research and report their findings

into the 2006 edition of "Used Car Buying Guide."

This fabulous tool will help steer any consumer

who is in the market for a used car towards the

better-performing and more reliable used car

models and away from those models with a

troubled past or substandard performance. Before

consumers set foot on a used car lot, they should

read all the valuable information provided in this

book so they can be armed with as much

information as possible and the knowledge to make

an educated choice. "Consumer Reports" knows

cars and offers the most detailed and revealing

used car reliability information available anywhere

including: - Reviews of every major model from

1998 - 2005 - Lists of the best and worst used

vehicles and how to avoid a lemon - A checklist of

what to look for when inspecting a used car - Tips

on negotiating the best price Reliability and crash

test information - Making sense of safety

information The majority of this book is devoted to

the profiles of 256 cars and trucks, presenting all

major 1998-2005 models. Each profile contains a

photo from the representative year, a write-up of

the vehicle, reliability history, crash-test data, and

the model years when key safety gear was added

and when a major redesign was made.

Enthusia Professional Racing Short Books
In this book, British architectural historian Iain Borden achieves the impossible a user manual for architecture. But the book's title, Manual, deriving from the handbooks for car mechanics, is not simply an ironic gesture: it indicates that this is a guide to architecture as a hands-on discipline; a guide to architecture through practice. Borden's analysis of the work of Allford Hall Monaghan Morris, the architectural practice formed in London ten years ago, looks at projects ranging from medical practices, offices and social housing to transport interchanges, pool-houses and lofts. All of these projects are explored in detail, and in 222 fully-illustrated pages Manual describes a framework of pathways, tendencies and ideas derived from inspiration, testing and experiments. With a rapidly-growing international reputation for inventive architectural designs, AHMM's work is collected in this book to provide a striking example of the growth of a successful architecture practice.
