Rap a Tap Tap Scholastic Inc.

In the tradition of Clementine and Ramona Quimby, meet Bat. Author Elana K. Arnold returns with another irresistible story of friendship in this widely acclaimed series starring an unforgettable boy on the autism spectrum. For Bixby Alexander Tam (nicknamed Bat), life is pretty great. He's the caretaker of the best baby skunk in the world—even Janie, his older sister, is warming up to Thor. When Janie gets a part in the school play and can't watch Bat after school, it means some pretty big changes. Someone else has to take care of the skunk kit in the afternoons, Janie is having sleepovers with her new friends, and Bat wants everything to go back to normal. He just has to make it to the night of Janie's performance. . . . Elana K. Arnold's Bat trilogy is a proven winner in the home and classroom—kids love these short illustrated young middle grade books.

The trilogy is A Boy Called Bat, Bat and the Waiting Game, and Bat and the End of Everything.

History Comes Alive Teaching Unit Scholastic Teaching Resources

In this engaging and spirited book, eminent social psychologist Robert Levine asks us to explore a dimension of our experience that we take for granted—our perception of time. When we travel to a different country, or even a different city in the United States, we assume that a certain amount of cultural adjustment will be required, whether it's getting used to new food or negotiating a foreign language, adapting to a different standard of living or another currency. In fact, what contributes most to our sense of disorientation is having to adapt to another culture's sense of time. Levine, who has devoted his career to studying time and the pace of life, takes us on an enchanting tour of time through the ages and around the world. As he recounts his unique experiences with humor and deep insight, we travel with him to Brazil, where to be three hours late is perfectly acceptable, and to Japan, where he finds a sense of the long-term that is unheard of in the West. We visit communities in the United States and find that population size affects the pace of life—and even the pace of walking. We travel back in time to ancient Greece to examine early clocks and sundials, then move forward through the centuries to the beginnings of "clock time" during the Industrial Revolution. We learn that there are places in the world today where people still live according to "nature time," the rhythm of the sun and the seasons, and "event time," the structuring of time around happenings (when you want to make a late appointment in Burundi, you say, "I'll see you when the cows come in"). Levine raises some fascinating questions. How do we use our time? Are we being ruled by the clock? What is this doing to our cities? To our relationships? To our own bodies and psyches? Are there decisions we have made without conscious choice? Alternative tempos we might prefer? Perhaps, Levine argues, our goal should be to try to live in a "multitemporal" society, one in which we learn to move back and forth among nature time, event time, and clock time. In other words, each of us must chart our own geography of time. If we can do that, we will have achieved temporal prosperity.

Daily Science, Grade 3 Teacher Edition Little, Brown Books for Young Readers

The time has come to fight for the enchanted land of Perodia!

Pick a book. Grow a Reader! This series is part of Scholastic's early chapter book line, Branches, aimed at newly independent readers. 180 Days of Geography is a fun and effective daily practice workbook designed to help students learn about geography. This easy-to-use third grade workbook is great for at-home learning or in the classroom. The engaging standards-based activities cover grade-level skills with easy to follow instructions and an answer key to quickly assess student understanding. Each week students will explore a new topic focusing on map skills, applying information and data, and connecting what they have learned. Watch students build confidence as they learn about location, place, human-environment interaction, movement, and regions with these quick independent learning activities. Parents appreciate the teacher-approved activity books that keep their child engaged and learning. Great for homeschooling, to reinforce learning at school, or prevent learning loss over summer. Teachers rely on the daily practice workbooks to save them valuable time. The ready to implement activities are perfect for daily morning review or homework. The activities can also be used for intervention skill building to address learning gaps.

Test Taking Scholastic Inc.

Supplement your social studies curriculum with 180 days of daily geography practice! This essential classroom resource provides teachers with weekly geography units that build students' geography knowledge, and are easy to incorporate into the classroom. In a world that is becoming more connected and globalized, 21st century students must have the skills necessary to understand their world and how geography affects them and others. Students will develop their map and spatial skills, learn how to answer text- and photo-dependent questions, and study the 5 themes of geography. Each week covers a particular topic and introduces students to a new place or type of map. The first two weeks consist of a mini-unit that focuses entirely on map skills. For additional units, students will study various places, and how culture and geography are related. With a focus on North American regions, students will explore various types of maps including physical maps, political maps, topographic maps, thematic maps, climate maps, and various topics including scale, legends, cardinal directions, latitude and longitude, and more. Aligned to state standards and National Geography Standards, this resource includes digital materials.
