By the time the 1969 model year rolled around, it was well established that muscle cars were fast and plentiful. Every

manufacturer had at least one corner of the showroom where the "go fast" guys could congregate and discuss the merits and time slips of the latest performance offerings. Competition being what it was, the manufacturers were looking for ways to entice potential buyers to choose their product over ever-increasing offerings from the competition. Some manufacturers tried to accomplish this with affordable prices, some tried fancy marketing schemes, and some created a look and a style that screamed "performance" even when standing still. The 1969 Mach I was Ford's attempt to create a package and a style to match the performance of its recently released and very potent 428-ci Cobra Jet

engine package. Displacing the still-available but more conservative GT trim, the Mach I included unique and innovative graphics and mechanical innovations including shaker hood scoops, dual racing mirrors, deluxe interiors, competition suspension, dual chrome exhaust tips, and blacked-out hoods. The result was a wildly popular model that sold more than 70,000 units, compared to slightly more than 5,000 GT models for the year. Each volume in the In Detail Series provides an introduction and historical overview, an explanation of the design and concepts involved in creating the car, a look at marketing and promotion, an in-depth study of all hardware and available options, and an

examination of where the car is on the market today. Also included are paint and option codes, VIN and build tag decoders, as well as production numbers.

The Ford modular engine is a popular swap for

1964-1/2-1973 Mustangs, Fox-Body Mustangs, trucks, hot rods, and other muscle cars because these high-tech engines provide exceptional performance and improved economy compared to their dated counterparts. Found in Mustangs and other Fords since the 1990s, installing a modular motor in a classic Ford infuses new technology and all the benefits that come with it into a classic car. Modular engines feature an overhead cam design that has massive horsepower potential, and are offered in 4.6-, 5.0-, 5.2- 5.4-, and 5.8-liter iterations. These high-

tech 2-, 3-, and 4-valve engines are readily available as a crate engine, from salvage yards, and in running cars. This engine design has a large physical footprint, and swapping the engine requires a thorough plan, using the proper tools and facilities. Author Dave Stribling specializes in modular engine swaps, and expertly guides you through each crucial step of the engine transplant process. Because of the large physical size, many components, such as brake boosters, steering rods and boxes, and other underhood components, may need repositioning or

modification to co-exist in the engine bay. Stribling covers motor-mount selection and fabrication, suspension and chassis modifications, aftermarket suspension options, firewall and transmission tunnel modifications, engine management and wiring procedures, fuel systems, exhaust systems, electrical mods and upgrades, and much more. Many older Ford muscle and performance cars are prime candidates for a modular swap; however, shock towers protrude into the engine bay of these cars, so modifications are necessary to fit the engine into

the car, which is also covered here. Swapping the engine and transmission into a muscle car or truck requires specialized processes, and this insightful, explanatory, and detailed instruction is found only in this book. If you are considering swapping one of these high-tech engines into a non-original chassis, this book is a vital component to the process. p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial} Mustang 1964 1/2-1973 Restoration Guide Haynes Publishing Popular Mechanics inspires, instructs and influences readers

According to Jesus, discipleship isn't an option. It's a commission that all are to invest in. A disciple is defined as someone who not only accepts the teachings of Jesus Christ but also helps spread these teachings into all corners of the world. Many accept the teachings of Jesus Christ as truth, but few are willing to share these teachings with others. The truth is, most Christians don't feel that they are equipped well enough to spread the Gospel. Radical Change is a tool for churches

and individuals to equip them to be trained up to observe all that Jesus commanded. The church today does a great job of celebrating when someone gives their life to Christ--and rightfully so, as even Jesus says there is more rejoicing in heaven over one sinner that repents than ninety-nine righteous people that don't need to repent. However, I feel that church fails and leaves them at the altar wondering what to do from there. We celebrate and then send them back into the wilderness to fend for themselves, hoping they will return next week. The great

commission is to make disciples, and I don't believe this is done through midweek Bible studies. Jesus called twelve individuals who would eventually turn the world upside down. He was more interested in the investment instead of the size of the congregation. The generation coming to the altar today doesn't have the support group at home to help them along this transformation journey. If we are going to make disciples to go into all nations, then the church has to take ownership of making the disciples. I wrote this book to help churches invest in the

sinner at the altar with the goal to get them to the cross over.
