Play with music Characters: 8 males (5 black, 3 white) 2 black females Scenery: Unit set It's 1927 in a rundown studio in Chicago where Ma Rainey is recording new sides of old favorites. More goes down in the session than music in this riveting portrayal of rage, racism, the self hate and exploitation. "Searing ... funny, salty, carnal and lyrical.... Wilson has lighted a dramatic fuse that snakes and hisses through several anguished eras of American life. When the fuse reaches its explosive final destination, the audience is impaled by the impact." N.Y. Times. "Brilliant ... explosive! Dramatically riveting." Newhouse Newspapers. Winner New York Drama Critics Circle Award.

National Electrical Code Reference Book Wesleyan Estelle Thompson is one of the most highly regarded painters of her generation. In her latest works -- many published here for the first time -- her rigorous pursuit of order in abstraction has led her to the laying down of color in stripes that seem to pulsate with life, hovering above the ground on which they are painted, escaping any association with form. Denying the viewer a point of focus, dazzling the eye in a manner reminiscent of the work of Bridget Riley, Thompson's work nonetheless appeals to the emotions as well as to the intellect. Color, above all, establishes the mood of each picture, in combinations that are complex and sometimes shockingly vivid. Her paintings are about light: light suggested, light contained, light reflected. Initially, Thompson saw her work, although abstract, as located within the Northern European landscape tradition; in her latest pieces, the references are broader, the placing less specific. This, the first monograph on the artist, offers an authoritative critical text and full-color reproductions of works from every stage of her career.

Engineering Analysis of Fires and Explosions demonstrates how professional forensic engineers apply basic concepts and principles from engineering and scientific disciplines to analyze fires and explosions. It describes how forensic engineers use a "reverse design" process to determine the original cause of a fire or explosion. This guide incorporates practices and lessons learned from the first-hand experiences of the author and his colleagues. It is an exciting introduction to the multidisciplinary subject of fire and explosion analysis and its legal ramifications. The author's straightforward language and style make the concepts easy

to understand.

A widely respected ecological scientist and activist draws on the poet's image and his own environmental research to demonstrate the many interconnections among the world's ecosystems. John Harte takes us from Alaskan salmon runs and the Florida everglades to South Pacific coral reefs and the bleak Tibetan plateau. The result is that rare book that bridges the cultures of science and art. Lyrical, vivid portraits of natural wonders and the threats to them are combined with precise scientific accounts of natural processes and their disturbances. The Green Fuse will show nonscientists the fascination of ecological detective work and renew scientists' love for the beauty of the world under their microscopes. Harte's stories illuminate, without sermonizing, the damage to natural systems brought about by technological hubris and calculated political ruthlessness. "The green fuse" symbolizes the basic unity behind natural diversity. But a fuse may also be the weak link in an overloaded system or the slow burning wick on an ecological bomb. As The Green Fuse reminds us, the energies that created human liberation from nature can also be those that lead to the human destruction of nature. In the 1930s and 1940s a band of smart and able young men-Thomas G. Corcoran, Benjamin V. Cohen, William O. Douglas, Abe Fortas, and James Rowe-helped Franklin D. Roosevelt build the modern American state and a progressive political coalition that seemed invincible. These junior officers of the New Deal numbered among their favorite members of Congress the young Lyndon B. Johnson of Texas. For thirty years, through LBJ's own presidency, they functioned as his intimate "kitchen cabinet."Michael Janeway grew up with an insider view of these brokers of ideas and power because his father, economist and journalist Eliot Janeway, was a member of their circle. Janeway crafts a riveting account of how these men worked together to fuse reform impulses in the social sciences and law with political advancement. Can a progressive coalition of ideas and power come together again? The Fall of the House of Roosevelt makes such a prospect both alluring and daunting.

Minidoka Revisited, a powerful compilation of the vibrant work of artist Roger Shimomura, chronicles experiences of racial and ethnic stereotyping endured by Asian Americans in recent history. From the incarceration of Japanese Americans during World War II, to contemporary everyday instances of cultural insensitivity, Shimomura's vivid, pointed works reflect one Japanese American's response to a sometimes

hostile American culture. Minidoka Revisited prompts its readers to question past actions, to consider current political environments, and to explore the safety of their own individuality within contemporary America. The paintings included span twenty-five years of Shimomura's work. Selections from his earlier series, including Minidoka Diary, and American Diary, chronicle his family's experiences leading up to and during their internment, with roughly 10,000 other Japanese Americans from the Pacific Northwest, at the Minidoka Relocation Center in south-central Idaho. Selections from his more recent series, including Stereotypes and Admonitions, reveal "snapshots and stories" of experiences of racial and ethnic insensitivity and discrimination faced today by the artist and other Asian Americans. Through accompanying essays and analysis, Minidoka Revisited invites us to consider how issues of stereo-typing have impacted America and its diverse citizenry, and how the very same issues continue to resonate in a post-9/11 world.
