The European Union has highlighted the issue of environmentally sound use of products in the context of Integrated Product Policy, IPP. Accordingly, consumers should have easy access to understandable, relevant and credible environmental information. Information about product characteristics is available in different forms and sources, but in many cases, relevant environmental information is not available on the product itself. The study described in this report was initiated in order to produce information on the state of user instructions regarding environmental information. User

manuals of passenger cars and refrigerators were focused on, examining the advice which could diminish the harmful environmental effects of the use of these products. Other studied products included such durable products as textiles and furniture as well as such consumables as cleaning chemicals and recyclable paper products. The study raised many ideas about actions that could promote the status and 'eco-development' of instructions for use.

A cultural history of the Volkswagen Beetle as told through historical photographs, many never before published in the

U.S. From the birth of the Beetle in wartime Germany through the development of the New Beetle prototype, Volkswagen Beetle: Portrait of a Legend celebrates a lighthearted, unusual view of the most successful automobile in history. This book is not a "how to identify your Beetle" book, nor is it a year-by-year charting of model changes. Rather, through other people's experiences of the car, it allows readers to recall their own fond memories of what it

was really like to own a Beetle in its heyday.

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles

unprecedented quality control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz - rich cars, poor quality. There's only one Saturn you should

buy. Toyota - enough apologies: "when you mess up, 'fess up."
