Ford FE Engines CarTech Inc

Ford's 351 Cleveland was designed to be a "mid-sized" V-8 engine, and was developed for higher performance use upon its launch in late 1969 for the 1970 models. The Cleveland engine addressed the major shortcoming of the Windsor engines that preceded it, namely cylinder head air flow. The Windsor engines just couldn't be built at the time to compete effectively with the strongest GM and Mopar small-block offerings, and the Cleveland engine was the answer to that problem. Unfortunately, the Cleveland engine was introduced at the end of Detroit's muscle car era, and the engine, in pure Cleveland form, was very short lived. It did continue on as a low compression passenger car and truck engine in the form of the 351M and 400M, which in their day, offered little in the way of excitement. Renewed enthusiasm in this engine has spawned an influx of top-quality new components that make building or modifying these engines affordable. This new book reviews the history and variations of the 351 Cleveland and Ford's related engines, the 351M and 400M. Basic dimensions and specifications of each engine, along with tips for identifying both design differences and casting numbers are covered. In addition, each engine's strong points and areas of concern are described in detail. Written with high performance in mind, both traditional power tricks and methods to increase efficiency of these specific engines are shared. Also, example builds of 400-, 500-, and even 600-hp engines are highlighted, so you can model your build after any of these powerhouses, depending on your intended use. With the influx of aftermarket parts, especially excellent cylinder heads, the 351 Cleveland as well as the 351M and 400m cousins are now seen as great engines to build. This book will tell you everything you need to know to build a great street or competition engine based in the 351 Cleveland platform.

In 2011, 25-year corporate veteran Sandy Van Soye had a dream to travel with a purpose.

Out of this vision came the Trekking the Planet expedition. Sandy and her husband Darren left their jobs and traveled 14 months to 53 countries on six continents, bringing the subject of geography to life through stories, pictures, and videos from the road. Following their travels were 55,000 students in 20 countries. Darren and Sandy traveled to such places as the Phongsali province of Laos, the countries of Kyrgyzstan and Uzbekistan, the Tigray region of Ethiopia, and the Amazon Rainforest of Brazil. An integral part of their journey was a goal to complete 500 miles of demanding trekking in 12 of the most remote locations on the planet. More than just about their expedition, Trekking the Planet is the story of Sandy's perseverance in making her dream come true. This was put to the test while trekking in difficult conditions, narrowly missing a plane crash in Nepal, and being bitten by a vampire bat in Brazil. This book not only details these challenges, but how the dream of traveling with a purpose ended up giving back in its own special way, changing her life forever.

The traditional Oldsmobile V-8 powered some of the most memorable cars of the muscle car era, from the 442s of the 1960s and early 1970s to the Trans Ams of the late 1970s. These powerful V-8s were also popular in ski boats. They have found a new lease on life with the recent development of improved aftermarket cylinder heads, aggressive roller camshafts, and electronic fuel injection. Author Bill Trovato is recognized as being one of the most successful Oldsmobile engine experts, and he openly shares all of his proven tricks, tips, and techniques for this venerable power plant. In this revised edition of Oldsmobile V-8 Engines: How to Build Max Performance, he provides additional information for extracting the best performance. In particular, he goes into greater detail on ignition systems and other areas of performance. His many years of winning with the Olds V-8 in heads-up, street-legal cars proves he knows how to extract maximum power from the design without sacrificing durability. A complete review of factory blocks, cranks, heads, and more is teamed with a thorough review of available aftermarket equipment. Whether mild or wild, the important information on cam selection and Olds-specific engine building techniques are all here. Fans of the traditional Olds V-8 will appreciate the level of detail and completeness Trovato brings to the table, and his frank, to-the-point writing style is as efficient and effective as the engines

he designs, builds, and races. Anyone considering an Oldsmobile V-8 to power their ride will save time, money, and headaches by following the clear and honest advice offered in Oldsmobile V-8 Engines: How to Build Max Performance. Plenty of full-color photos and step-by-step engine builds showcase exactly how these engines should be built to deliver the most power per dollar.

Ford FE engines, which were manufactured from the late 1950s all the way through the mid-1970s, were designated as the large-displacement engines in the Ford lineup. FE means Ford Edsel, and reflects an era when Ford sought to promote the Edsel name. The design of these engines was implemented to increase displacement over its predecessor, the Y-Block engines of the previous decade. Early models were fairly modest in displacement, as were most big-blocks of the era, but they grew quickly to fill the needs of rapidly changing chassis requirements and consumer demand for larger vehicles. As it grew, the FE engine performed admirably as a heavy passenger car and light truck engine. It also became quite accomplished in performance circles, winning the 24 Hours of Le Mans, as well as powering Ford's muscle car and drag racing programs in the mid- to late 1960s. In this book, you will learn everything you need to know to rebuild one of these legendary engines. CarTech's unique Workbench series format takes you step-by-step through the entire rebuilding process. Covered are engine identification and selection, disassembly, cleaning, parts analysis and assessment, machine shop processes, replacement parts selection, re-assembly and start-up/break-in techniques. Along the way you find helpful tips on performance upgrades, trouble spots to look for, special tools required, and professional builder's tips. FE master, owner of Survival Motorsports, and veteran author Barry Raboutnick shares all of his tricks and secrets on building a durable and reliable FE engine. Whether you are simply rebuilding an old truck for reliable service use, restoring a 100-point show car, or building the foundation for a high-performance street and strip machine, this book will be an irreplaceable resource for all your future FE engine projects.

The death of a child should never pre-date that of their parents. It's happening far too often more and more in the current generation. The cause of the current epidemic of depression and teen suicide will be studied for decades to follow. In the present, we as parents must open our eyes, our ears, our minds, and our hearts to a desperate situation. The second leading cause of death of our young people is suicide. When, during your own youth did you ever give serious and pensive thought to taking your own life? Perhaps in a fleeting moment when you experienced sharp pain of a love lost or a word said, but today, the option of suicide is "on the menu" of choices and our youth talk about that menu item daily. We implore readers to learn about this taboo topic... "The 'S' Word" and to help ensure it is not kept a subject we don't talk about, but rather one we openly acknowledge and fight against as informed parents to a lost and lonely generation.
