The Car Book 2003 Haynes Manuals N. America, Incorporated
Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.

Chevrolet Corvette, 1968-1982 Haynes Manuals N. America, Incorporated
Madison made history in the sixties. Landmark civil rights laws were passed. Pivotal campus protests were waged. A spring block party turned into a three-night riot. Factor in urban renewal troubles, a bitter battle over efforts to build Frank Lloyd Wright's Monona Terrace, and the expanding influence of the University of Wisconsin, and the decade assumes legendary status. In this first-ever comprehensive narrative of these issues—plus accounts of everything from politics to public schools, construction to crime, and more—Madison historian Stuart D. Levitan chronicles the birth of modern Madison with style and well-researched substance. This heavily illustrated book also features annotated photographs that document the dramatic changes occurring downtown, on campus, and to the Greenbush neighborhood throughout the decade. Madison in the Sixties is an absorbing account of ten years that changed the city forever.

VW Golf, GTI, Jetta and Cabrio, 1999 Thru 2002 Haynes Manuals N. America, Incorporated
AE101, AE102, AE112, ZZE122 1.6L & 1.8L engines

Toyota Land Cruiser, 1968-1982 CarTech Inc

Toyota's legendary FJ40, the rugged off-road two-door Landcruiser introduced in 1960, sold more than one million models in its lifetime—and is still in service in the roughest parts of the world, nearly a quarter of a century after the last one rolled off the assembly line. As Toyota prepares to roll out its new version of this classic, this book offers a close-up, behind-the-scenes look at the development and production of the new FJ Cruiser, a retro 4x4 that combines its famous predecessor's unparalleled style with solid off-road capabilities and all the convenience and comfort that today's technology offers. With interviews from the designers, engineers, and executives involved in making the FJ Cruiser, as well as more than 150 photos of the new vehicle and details on the 4x4's specifications, this book puts readers into the driver's seat of Toyota's next classic Cruiser.

Mazda Miata MX-5 Performance Projects Haynes Manuals N. America, Incorporated

Machining is an essential part of high-performance engine building and stock rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of Engine Building Professional, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valveseat cutting, cam tunnel boring, and a multitude of other services. In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching valvetrain components are also covered. Whether you're an enthusiast engine builder or prospective machining student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures.

Toyota Highlander Lexus RX 300/330 1999 Thru 2007 Penguin Hardcover
