What are philosophers trying to achieve? How can they succeed? Does philosophy make progress? Is it in competition with science, or doing something completely different, or neither? Timothy Williamson tackles some of the key questions

surrounding philosophy in new and provocative ways, showing how philosophy begins in common sense curiosity, and develops through our capacity to dispute rationally with each other. Discussing philosophy's ability to clarify our thoughts, he explains why such clarification depends on the development of philosophical theories, and how those theories can be tested by imaginative thought experiments, and compared against each other by standards similar to those used in the natural and social sciences. He also shows how logical rigour can be understood as a way of enhancing the explanatory power of philosophical theories. Drawing on the history of philosophy to provide a track record of philosophical thinking's successes and failures, Williamson overturns widely held

dogmas about the distinctive nature of philosophy in comparison to the sciences, demystifies its methods, and considers the future of the discipline. From thought experiments, to deduction, to theories, this little book will cause you to totally rethink what philosophy is.

Have you ever lain awake at night worried about how we can be sure of the reality of the external world? Perhaps we are in fact disembodied brains, floating in vats at the whim of some deranged puppetmaster. If so, you are not alone--and what's more, you are in exalted company--for this question and other ones like it have been the stuff of philosophical rumination from Plato to Popper. In a series of accessible and engagingly written essays, *50 Philosophy Ideas You Really Need to Know* introduces

and explains the problems of knowledge, consciousness, identity, ethics, belief, justice, and aesthetics that have engaged the attention of thinkers from the era of the ancient Greeks to the present day.

'This is brilliant. A book about women in philosophy by women in philosophy – love it!' Elif Shafak

Where are the women philosophers? The answer is right here. The history of philosophy has not done women justice: you 've probably heard the names Plato, Kant, Nietzsche and Locke – but what about Hypatia, Arendt, Oluwole and Young? The *Philosopher Queens* is a long-awaited book about the lives and works of women in philosophy by women in philosophy. This collection brings to centre stage twenty prominent women whose ideas have had a profound – but for the most part uncredited – impact on the world. You 'll learn about Ban Zhao,

the first woman historian in ancient Chinese history; Angela Davis, perhaps the most iconic symbol of the American Black Power Movement; Azizah Y. al-Hibri, known for examining the intersection of Islamic law and gender equality; and many more. For anyone who has wondered where the women philosophers are, or anyone curious about the history of ideas – it's time to meet the philosopher queens.

In this deeply learned book, poet and translator Robert Bly offers nothing less than a new vision of what it is to be a man. Bly's vision is based on his ongoing work with men and reflections on his own life. He addresses the devastating effects of remote fathers and mourns the disappearance of male initiation rites in our culture. Finding rich meaning in ancient stories and legends, Bly uses the Grimm fairy tale "Iron John," in which the narrator, or "Wild Man," guides a young

man through eight stages of male growth, to remind us of archetypes long forgotten – images of vigorous masculinity, both protective and emotionally centered. Simultaneously poetic and down-to-earth, combining the grandeur of myth with the practical and often painful lessons of our own histories, Iron John is a rare work that will continue to guide and inspire men-and women-for years to come.

The Republic is a Socratic dialogue, written by Plato around 380 BCE, concerning the definition of justice, the order and character of the just city-state and the just man. The dramatic date of the dialogue has been much debated and though it must take place some time during the Peloponnesian War, "there would be jarring anachronisms if any of the candidate specific dates between 432 and 404 were assigned". It is Plato's best-known work and

has proven to be one of the most intellectually and historically influential works of philosophy and political theory. In it, Socrates along with various Athenians and foreigners discuss the meaning of justice and examine whether or not the just man is happier than the unjust man by considering a series of different cities coming into existence "in speech", culminating in a city (Kallipolis) ruled by philosopher-kings; and by examining the nature of existing regimes. The

participants also discuss the theory of forms, the immortality of the soul, and the roles of the philosopher and of poetry in society.

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of *When: The Scientific Secrets of Perfect Timing* Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of *To Sell Is Human: The*

Surprising Truth About Motivating Others). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction—at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create new things, and to do better by ourselves and our world. Drawing on four decades of scientific research on human motivation, Pink exposes the mismatch between what science knows and what business does—and how that affects every aspect of life. He examines the three elements of true motivation—autonomy,

mastery, and purpose-and offers smart and surprising techniques for putting these into action in a unique book that will change how we think and transform how we live.

Friendship. Romance. Family. These are the three areas Ethan Nichtern delves into, taking as departure points the indelible characters--Westley, Fezzik, Vizzini, Count Rugen, Princess Buttercup, and others from Rob Reiner's perennially popular film--as he also draws lessons from

his own life and his work as a meditation teacher. Nichtern devotes the first section of the book to exploring the dynamics of friendship. Why do people become friends? What can we learn from the sufferings of Inigo Montoya and Fezzik? Next, he leads us through all the phases of illusion and disillusion we encounter in our romantic pursuits, providing a healthy dose of lightheartedness along the way by sharing his own Princess Buttercup List and the vicissitudes of his dating life as he ponders how we

idealize and objectify romantic love. Finally, Nichtern draws upon the demands of his own family history and the film's character the Grandson to explore the dynamics of "the last frontier of awakening," a reference to his teacher Chogyam Trungpa's claim that it's possible to be enlightened everywhere except around your family.

Fifty Readings in Philosophy Rare Treasure Editions

A thought-provoking contribution to the renaissance of interest in Bergson, this study brings him to a new generation of readers.

Ansell-Pearson contends that there is a Bergsonian revolution, an upheaval in philosophy comparable in significance to those that we are more familiar with, from Kant to Nietzsche and Heidegger, that make up our intellectual modernity. The focus of the text is on Bergson's conception of philosophy as the discipline that seeks to 'think beyond the human condition'. Not that we are caught up in an existential predicament when the appeal is made to think beyond the human condition; rather that restricting philosophy to the human condition fails to appreciate the extent to which we are not simply creatures of habit and automatism, but also organisms involved in a creative evolution of becoming.

Ansell-Pearson introduces the work of Bergson and core aspects of his innovative modes of thinking; examines his interest in Epicureanism; explores his interest in the self and in time and memory; presents Bergson on ethics and on religion, and illuminates Bergson on the art of life.

Philosophy: The Classics

A deluxe, high-quality edition of Friedrich Nietzsche's seminal work *Beyond Good and Evil* is one of the final books by German philosopher Friedrich Nietzsche. This landmark work continues to be one of the most well-known and influential explorations of moral and ethical philosophy ever conceived. Expanding on the concepts from his previous work *Thus Spoke Zarathustra*, Nietzsche adopts a polemic approach to past philosophers who, in his view, lacked critical sense in accepting

flawed premises in their consideration of morality. The metaphysics of morality, Nietzsche argues, should not assume that a good man is simply the opposite of an evil man, rather merely different expression of humanity's common basic impulses. Controversial in its time, as well as hotly debated in the present, Nietzsche's work moves beyond conventional ethics to suggest that a universal morality for all human beings in non-existent - perception, reason and experience are not static, but change according to an individual's perspective and

interpretation. The work further argues that philosophic traditions such as "truth," "self-consciousness" and "free will" are merely inventions of Western morality and that the "will to power" is the real driving force of all human behaviour. This volume: Critiques the belief that actions, including domination or injury to the weak, can be universally objectionable Explores themes of religion and "master and slave" morality Includes a collection of stunning aphorisms and observations of the human condition Part of the

bestselling Capstone Classics Series edited by Tom Butler-Bowdon, this collectible, hard-back edition of *Beyond Good and Evil* provides an accessible and insightful Introduction by leading Nietzsche authority Dr Christopher Janaway. This deluxe volume is perfect for anyone with interest in philosophy, psychology, science, history and literature.

This book guides readers through ten classic works of Asian philosophy. Several major schools of Eastern thought are discussed, including Hinduism, Buddhism, Confucianism, Daoism/Taoism, and Chan/Zen. The author

connects the ideas of these schools to those of Western philosophy, thereby making the material accessible to people who are unfamiliar with the cultures and intellectual traditions of Asia. A wide range of important topics are addressed: reality, time, self, knowledge, ethics, human nature, enlightenment, and death.
