This book confronts the failings of current

global economics to deliver the equity,

sustainability and community empowerment

which humanity now needs to handle a

troubled future. The volume proposes an

economy built from our society, not the other

way around. The Kyoto Manifesto was built,

layer by layer, over a period of 4 years, based

on broad-ranging international symposia held

in Kyoto between 2014 and 2017, hosted by

the Center for the Creative Economy,

Doshisha University. Not stopping at theory

and untested ideas however, the Manifesto

proposes practical action that will make a

difference, including in the problematic

technological and ecological context of

humanity's immediate and long-term future.

The book is unique and innovative for it moves

adventurously across very broad territory. The

Manifesto draws from world philosophic

arguments, including, specifically, a critique of

"liberalism", further, exploring sociology,

cultural anthropology, politics, primatology and

early humanity, even quantum physics.

Argument is set within mainstream post-1972

economics and political economics as well as

direct practical experience working to

empower disadvantaged communities through

the United Nations. Most importantly, the book's analysis is deeply informed by the practice of searching for what is "sacred", the ultimate essence of our humanity, what we can be as a human race—empowered, fulfilled individuals, deeply sharing and caring for each other across our separate cultures and lives. Stomu Yamash'ta's On Zen performances, set the context for the Symposia, bringing different religions and cultures together across their dividing boundaries into a coherent search for peace and harmony through sacred music. Informed by alternate cultural paradigms for economics, the book probes deeply into philosophies and practices that already exist within Eastern and Western societies, and offer lessons for our future. The result is an economics that stresses harmony with nature, and balance in social relations. It places an emphasis on community—human sharing and trust—as a platform for our future, not separate from the global economy but integrated into its very foundations. This is a book for all who care: a plan for our sustainable future built from the best of what our humanity is and can offer.
