Delivering research outputs has become increasingly important for many students involved in working towards a research degree. RE:search ABC highlights contemporary practices and provides a framework for an up-to-date understanding of the research process and the key issues associated with it. It integrates a number of imperative topics, including the writing of a research protocol, the applying of methodology in research projects, the respective roles of the supervisor and student,

the writing of a scientific article and the presenting of research results. The analysis draws upon both theory and real case studies.

New Zealand Journal of Crop and Horticultural Science/Experimental Agriculture Springer Science & Business Media

This book is being simultaneously published as a special issue of the *Journal of Architectural Conservation*, and presents the very latest research and developments in the cleaning of buildings, sculpture and monuments. It covers both wet and dry micro abrasive systems, other types of abrasives, laser cleaning methods and proprietary poultices for specialized applications. The material presented is supported by case study examples from an international selection of major buildings and monuments, where the techniques have recently been tried and tested.

REsearch ABC Penguin

This book constitutes a coherent anthology consisting of invited chapter-length papers on intelligent hypertext techniques with special emphasis on how to apply these techniques to the World Wide Web. The book provides an

introductory preface by the volume editors and chapters on information comprehension through hypertext, efficient techniques for adaptive hypermedia, annotated 3D environments on the Web, user models for customized hypertext, conceptual analysis of hypertext, two-level models of hypertext, the TELLTALE dynamic hypertext environment, hypertext for collaborative authoring, information retrieval and information agents.

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

New Zealand Journal of Agricultural Research Springer Nature

No other narrative from within the corridors of power has offered as frank and intimate an account of the making of the modern Chinese nation as Ji Chaozhu's *The Man on Mao's Right*. Having served Chairman Mao Zedong and the Communist leadership for two decades, and having become a key figure in China's foreign policy, Ji now provides an honest, detailed account of the personalities and events that shaped today's People's Republic. The youngest son of a prosperous

government official, nine-year-old Ji and his family fled Japanese invaders in the late 1930s, escaping to America. Warmly received by his new country, Ji returned its embrace as he came of age in New York's East Village and then attended Harvard University. But in 1950, after years of enjoying a life of relative ease while his countrymen suffered through war and civil strife, Ji felt driven by patriotism to volunteer to serve China in its conflict with his adoptive country in the Korean War. Ji's mastery of the English language and American culture launched his improbable career, eventually winning him the role of English interpreter for China's two top leaders: Premier Zhou Enlai and Party Chairman Mao Zedong. With a unique blend of Chinese insight and American candor, Ji paints insightful portraits of the architects of modern China: the urbane, practical, and avuncular Zhou, the conscience of the People's Republic; and the messianic, charismatic Mao, student of China's ancient past—his country's stern father figure. In Ji's memoir, he is an eyewitness to modern Chinese history, including the Great Leap Forward, the Cultural Revolution, the Nixon summit, and numerous momentous events in Tiananmen Square. As he becomes caught up in political squabbles among radical factions, Ji's past and charges against him of "incorrect" thinking subject him to scrutiny and suspicion. He is repeatedly sent to a collective farm to be "reeducated" by

the peasants. After the Mao years, Ji moves on to hold top diplomatic posts in the United States and the United Kingdom and then serves as under secretary-general of the United Nations. Today, he says, "The Chinese know America better than the Americans know China. The risk is that we misperceive each other." This highly accessible insider's chronicle of a struggling people within a developing powerhouse nation is also Ji Chaozhu's dramatic personal story, certain to fascinate and enlighten Western readers. A riveting biography and unique historical record, *The Man on Mao's Right* recounts the heartfelt struggle of a man who loved two powerful nations that were at odds with each other. Ji Chaozhu played an important role in paving the way for what is destined to be known as the Chinese Century. Praise for *The Man on Mao's Right* "Brave, beautifully written testimony . . . A true "fly-on-the-wall" account of the momentous changes in Chinese society and international relations over the last century." --Kirkus Reviews "It is a relief to read an account by an urbane and often witty insider who neither idolizes nor demonizes China's top leaders . . . Highly recommended." —Library Journal, starred review

Authoring a PhD is a complex process. It involves having creative ideas, working out how to organize them, writing up from plans, upgrading the text, and finishing it speedily and to a good standard. It also includes being examined and getting published.

Patrick Dunleavy has written Authoring a PhD based on his supervision experience with over 30 students. It provides solid advice to help your PhD students cope with both the intellectual issues and practical difficulties of organizing their work effectively. It is an indispensable and time saving aid for doctoral students in the humanities, social sciences, education, business studies, law, health, arts and visual arts, and related disciplines, and will also be a great help to supervisors.

This guide provides a framework, starting from simple statements, for writing papers

for submission to peer-reviewed journals. It also describes how to address referees' comments, approaches for composing other types of scientific communications, and key linguistic aspects of scientific writing.

Tourism Recreation Research JHU Press

This book helps students and researchers write better assignments, better dissertations, and better papers for publication. Characterizing academic writing as an integral part of the knowledge generation and dissemination process, it focuses on three main aspects: understanding research, documenting and sharing the process and results of research, and acknowledging the use of other people's ideas in the documentation. The authors use various samples of good as well as defective writing to illustrate the features of academic writing. They describe in detail the structure and contents of academic papers, especially conceptual and empirical research papers for journals. This lucidly written book will be a rich resource for MBA students and researchers working for MPhil and PhD degrees, especially in the fields of management, behavioural sciences and communications.

Six Legs Better Springer Science & Business Media

Writing for Publication in Nursing and

Healthcare helps readers develop the skills necessary for publishing in professional journals, presenting conference papers, authoring books, research reports, and literature reviews, and more. This comprehensive resource covers all aspects of writing for publication, including good practice in reviewing, the editorial process, ethical aspects of publishing, and the rules that govern academic writing, publishing, and dissemination. Assuming no prior expertise in the subject, the text uses an accessible, step-by-step approach that incorporates a wealth of real-life examples, hands-on activities, and valuable tips throughout. The second edition reflects the latest developments, guidelines, and practices both in academic publishing and in research assessment and dissemination. New and updated material covers the increasing use of social media to disseminate published work, post-publication scrutiny, contemporary issues surrounding predatory or unethical publishers, and new requirements for research

registration and submission data. Edited by leading experts in the field, this practical 'how to' guide: Describes the basics of writing for publication and how to get started Includes numerous examples illustrating the practical ways abstracts, papers, book reviews, and other publications are written and disseminated Discusses current issues and developments, such as the impact of major ethics organisations on publishing worldwide and the rise of online journals, blogging, and podcasting Features contributions by internationally recognised academics and practitioners Explains how to turn research reports and other assignments into publishable works The definitive introduction to the subject, *Writing for Publication in Nursing and Healthcare* is a must-have for all nurses and healthcare professionals, as well as undergraduate and graduate students in nursing and healthcare programs who are required to write for publication. [2013 Novel & Short Story Writer's Market](#) John Wiley & Sons Presenting a variety of viewpoints on

current issues across disciplines, *PERSPECTIVES ON CONTEMPORARY ISSUES*, 8e, equips readers to think, read, and write critically. Emphasizing writing and research, Part I offers separate chapters on reading critically, the writing process, writing a summary, the critique, argumentation, synthesis requiring documentation, and the research paper. Part II is packed with captivating readings organized by broad-based curricular areas. Helping students fully engage on a personal level, questions at the end encourage a reaction to the readings while Responding to Visuals sections prompt students to analyze images. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. [New Zealand Journal of Agricultural Research](#) Random House In this book, Graham Connah offers an overview of archaeological authorship: its diversity, its challenges, and its methodology. Based on his own experiences, he presents his personal views about the task of writing

about archaeology. The book is not intended to be a technical manual. Instead, Connah aims to encourage archaeologists who write about their subject to think about the process of writing. He writes with the beginning author in mind, but the book will be of interest to all archaeologists who plan to publish their work. Connah's overall premise is that those who write about archaeology need to be less concerned with content and more concerned with how they present it. It is not enough to be a good archaeologist. One must also become a good writer and be able to communicate effectively. Archaeology, he argues, is above all a literary discipline.
