unfamiliar concept to most investors compared to other asset classes, such as equities and commodities. Every red-top newspaper and 24-hour news service is happy to report the latest twitch in the Dow, FTSE or Stoxx indices but momentous moves in the iBoxx or iTraxx go unmentioned. And whereas many a talking head is happy to pose as an equity analyst, few feel comfortable venturing into the arcana of credit. Yet the corporate credit market, as the authors of this new book show, is both materially larger than its equity peer and has shown more attractive risk/reward characteristics over the last 90-odd years. In *Opening Credit*, career credit professionals, Justin McGowan and Duncan Sankey, aim to redress this by drawing on their

Sessional Papers Oxford University Press
As a result of prevailing monetary conditions since the global financial crisis, the world has witnessed unprecedented growth in global corporate credit markets. Yet, despite the trillions of dollars put to work in the debt capital markets, corporate credit is still an

more than 50 years' collective experience in the field to elucidate a practitioner's approach to corporate credit investment. Whilst explaining the basics of traditional credit analysis and affirming its value, McGowan and Sankey also caution against its shortcomings. They demonstrate the need both to penetrate the veil of accounting to get to the economic reality behind the annuals and interim numbers and to analyse the individuals that drive them - the key executives and board members. They employ a range of cogent and easy-to-follow case studies to illustrate the value of their executive- and governance-led approach, which places management front and centre in understanding corporate credit. Opening Credit will appeal to all those seeking a better understanding of corporate credit, including analysts looking to develop their skills, fund managers (especially those with an eye to SRI), bankers, IFAs, financial journalists, academics and students of finance.

The introduction of new topologies and training procedures to deep neural networks has solicited a renewed interest in the field of neural computation. The use of deep structures has significantly improved state-of-the-art applications in many fields, such as computer vision, speech and text processing, medical applications, and IoT (Internet of Things). The probability of a successful outcome from a neural network is linked to selection of an appropriate network architecture and training algorithm. Accordingly, much of the recent research on neural networks has been devoted to the study and proposal of novel architectures, including solutions tailored to specific problems. This book gives significant contributions to the above-mentioned fields by merging theoretical aspects and relevant applications.

The long-awaited second volume of Nelson Mandela ' s memoirs, left unfinished at his death and never before available, are here completed and expanded with notes and speeches written by Mandela during his historic presidency, making for a moving sequel to his worldwide bestseller Long Walk to Freedom. " I have discovered the secret that after climbing a great hill, one only finds that there are many more hills to climb. I have taken a moment here to rest, to steal a view of the glorious vista that surrounds me, to look back on

the distance I have come. But I can rest only for a moment, for with freedom comes responsibilities, and I dare not linger, for my long walk is not ended." In 1994, Nelson Mandela became the first president of a democratic South Africa. From the outset, he was committed to serving only a single five-year term. During his presidency, he and his government ensured that all of South Africa's citizens became equal before the law, and he laid the foundation for turning a country riven by centuries of colonialism and apartheid into a fully functioning democracy. *Dare Not Linger* is the story of Mandela's presidential years, drawing heavily on the memoir he began to write as he prepared to leave office, but was unable to finish. Now the acclaimed South African writer Mandla Langa has completed the task, using Mandela's unfinished draft, detailed notes that Mandela made as events were unfolding, and a wealth of unseen archival material. With a prologue by Mandela's widow, Graça Machel, the result is a vivid and often inspirational account of Mandela's presidency and the creation of a new democracy. It tells the story of a country in transition and the challenges Mandela faced as he strove to make his vision for a liberated South Africa a reality.

A ride on a steam train is a popular family outing. More than 100 heritage railways cater for that demand, capturing the spirit of nostalgia while preserving the engines and equipment of past days of rail travel. Their interests even extend to the modern era of 1960's - 70's diesels. Those heritage railways themselves have a long pedigree, back to 1951, when a group of enthusiasts saved the Talyllyn Railway in mid-Wales from closure. They ran this railway as volunteers, out of their love of the little trains and a desire to keep it going. Their example was followed by many more preservation societies who preserved and restored branch lines, country lines and industrial lines for our enjoyment now. Six decades have passed, and we are now beginning to realize what an impressive history the heritage railway movement has. This book traces that history, from the humble beginnings the hopes

and ambitions of the pioneers on the different railway projects. There were times of failure and frustration, as some fell by the wayside, but others have made it through times of adversity to become the major heritage businesses of today.

Since the adoption of the Rome Statute of the International Criminal Court in 1998, international criminal law has rapidly grown in importance. This three-volume treatise on international criminal law presents a foundational, systematic, consistent, and comprehensive analysis of the field. Taking into account the scholarly literature, not only sources written in English but also in French, German, Italian, Portuguese, and Spanish, the book draws on the author's extensive academic and practical work in international criminal law. This third

volume offers a comprehensive analysis of the procedures and implementation of international law by international criminal tribunals and the International Criminal Court. Through analysis of the framework of international criminal procedure, the author considers each stage in the process of proceedings before the ICC, including the role of legal participants, the scope of jurisdiction, and the enforcement of sentences. The full three-volume treatise addresses the entirety of international criminal law, restating and re-examining the fundamental principles upon which it rests, the manner it is enacted, and the key issues that are shaping its future. It is essential reading for practitioners, scholars, and students of international criminal law alike.

Despite the growing importance of 'consumer welfare' in EU competition law debates, there remains a significant disconnect between rhetoric and reality, as consumers and their interests still play only an ancillary role in this area of law. Consumer Involvement in Private EU Competition Law Enforcement is the first monograph to exclusively address this highly topical and much debated subject, providing a timely and wide-ranging examination of the need for more active consumer participation in competition law. Written by an expert in the field, it sets out a comprehensive framework of policy implications and arguments for greater involvement, positioning the debate in the context of a broader EU

law perspective. It outlines pragmatic approaches to remedial and procedural measures that would enable consumer empowerment. Finally, the book identifies key institutional and political obstacles to the adoption of effective measures, and suggests alternative routes to enhance the role of consumers in private competition law enforcement. The book's innovative approach, combining normative analysis and practical solutions, make it invaluable for academics, policy-makers, and practitioners in the field.

Many environmental and social benefits will result from implementing activities to tackle emissions from deforestation and forest degradation and to promote the conservation of forest carbon stocks, as well as from the sustainable management of forests and carbon enhancements in developing countries (REDD+). Benefit sharing in REDD+ refers to the ways in which the financial benefits resulting from these activities will be distributed among different local stakeholders within a country. It is necessary to create ad hoc institutional frameworks and design equitable and transparent benefit sharing schemes such that the rewards may be distributed among all the many stakeholders within the country who have in some way participated in the achievements. This report presents a summary of the gaps and problems

in the design of benefit sharing schemes, focusing particularly on the need to develop pro-poor schemes, and includes the Forest Dialogues' main recommendations and suggestions. An assessment of both the challenges and the potential paths for implementation is included in the example provided by the case of implementation of REDD+ in Mexico.

Treatise on International Criminal Law Bloomsbury Publishing
This collection investigates the sharpening conflict between the nation state and the internet through a multidisciplinary lens. It challenges the idea of an inherently global internet by examining its increasing territorial fragmentation and, conversely, the notion that for states online law and order is business as usual. Cyberborders based on national law are not just erected around China's online community. Cultural, political and economic forces, as reflected in national or regional norms, have also incentivised virtual borders in the West. The nation state is asserting itself. Yet, there are also signs of the receding role of the state in favour of corporations wielding influence through de-facto control over content and technology. This volume contributes to the online governance debate by joining ideas from law, politics and human geography to explore internet jurisdiction and its overlap with topics such as freedom of expression, free trade, democracy, identity and cartographic maps.

The definitive edition of the classic, myth-shattering history of the American family *Leave It to Beaver* was not a documentary, a man's home has never been his castle, the "male breadwinner marriage" is the least traditional family in history, and rape and sexual assault were far higher in the 1970s than they are today. In *The Way We Never Were*, acclaimed historian Stephanie Coontz examines two centuries of the American family, sweeping away misconceptions about the past that cloud current debates about domestic life. The 1950s do not present a workable model of how to conduct our personal lives today, Coontz argues, and neither does any other era from our cultural past. This revised edition includes a new introduction and epilogue, exploring how the clash between growing gender equality and rising economic inequality is reshaping family life, marriage, and male-female relationships in our modern era. More relevant than ever, *The Way We Never Were* is a potent corrective to dangerous nostalgia for an American

tradition that never really existed.
